

innomine

Industry 4.0 Workshop

- Factories of the Future -

innomine

We are **transatlantic innovation advisors**.
From **Silicon Valley to Europe** - we got you covered.

Track record of over a decade to work with EU funds (focusing on structural funds: **50+** innovation and industrial **innovation projects**) and experienced with H2020 / Brussels funds; **extensive partner network** especially in **CEE region** (e.g. ICT Associations & Clusters, Chambers)

Based in Hungary and Silicon Valley, working in Brussels and many EU countries, **main clients: multinationals, industrial players, startup / scale-ups, research centres, NGOs, etc.**

- Specific related topics / domains:**
- Industrial Automation – Industry 4.0
 - Internet of Things (IoT)
 - Cybersecurity
 - Big Data

H2020 – Industry 4.0 projects

Previous

I4MS initiative (ICT Innovation for Manufacturing SMEs) Phase 1 (July 2013) & Phase 2 (autumn 2015) to support SMEs and mid-caps in the manufacturing sector

Ongoing

Horizon 2020 FOF-12-2017: ICT Innovation for Manufacturing SMEs (Phase 3 of I4MS) – ClouDiFacturing (consortia leader: Fraunhofer)

Forthcoming

H2020 – 2018-2020 Work Programme calls – Digitising and transforming European industry and services (e.g. Phase 4 of I4MS, Robotics, Digital Manufacturing Platforms for Connected Smart Factories, etc.)

CloudiFacturing - Mission

The mission of **CloudiFacturing** is to optimize

- production processes and
- productibility

using

- Cloud/HPC-based modelling and
- simulation

leveraging

- online factory data and
- advanced data analytics

thus contributing to the

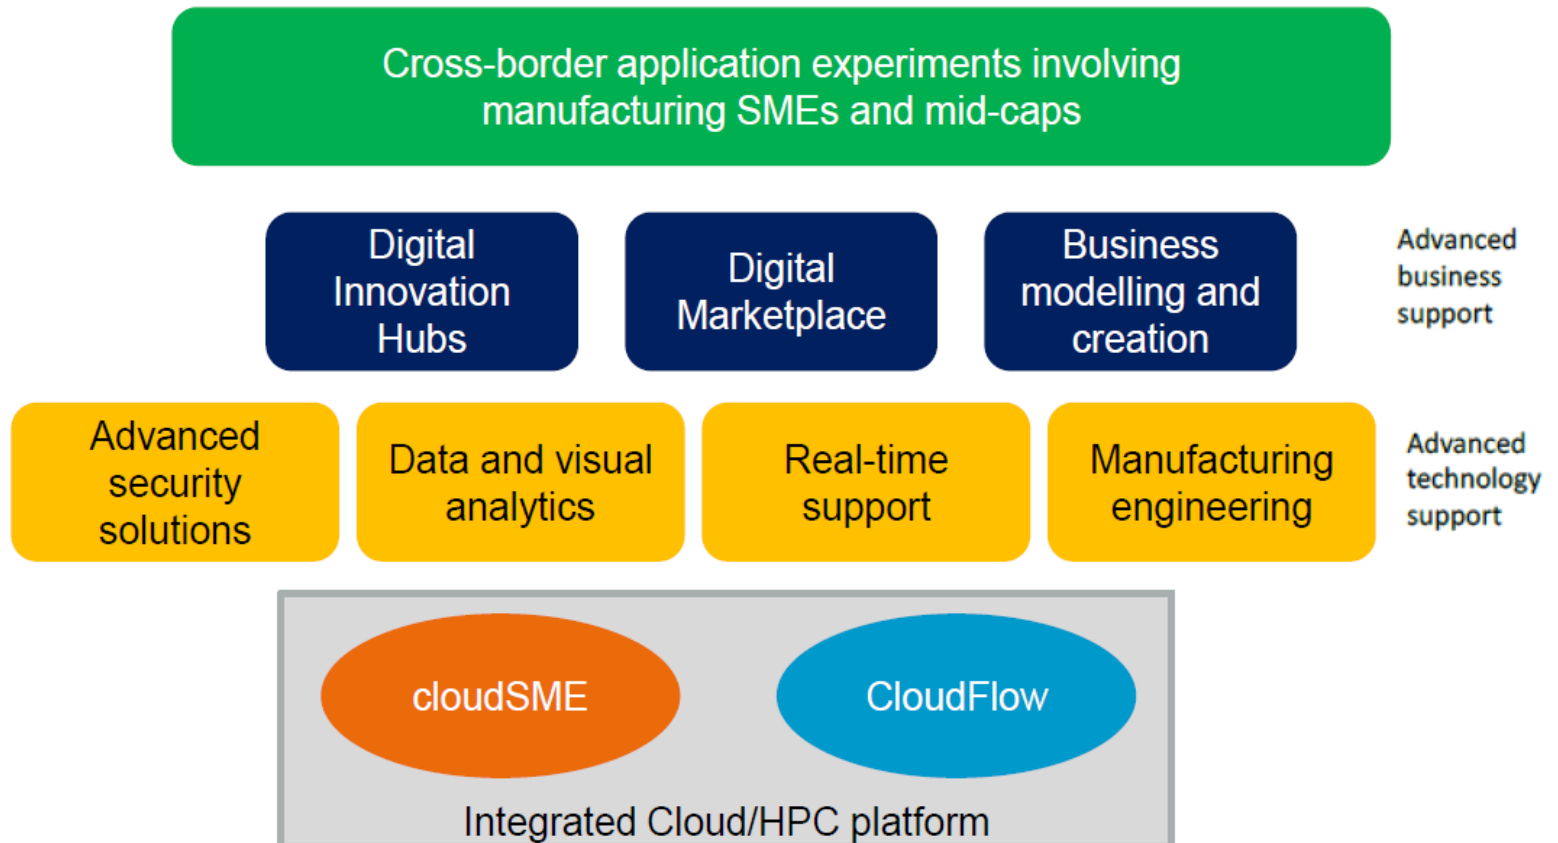

- competitiveness and
- resource efficiency

of manufacturing SMEs, ultimately fostering the vision of

- Factories 4.0 and
- the circular economy.

CloudiFacturing - Ambition

4 layers of ambition

innomine as a Digital Innovation Hub

Having strong network in CEE

Rooted in / linked to national 'digitization of industry' initiatives

Fostering, driving and coordinating Industry 4.0 Application Experiments

Maintain, expand and create the (regional) ecosystem on ICT Innovation for Manufacturing SMEs (I4MS) related activities, including networking, matchmaking, brokerage and dissemination activities

Offering innovation services to activate, support and stimulate the valorisation of I4MS technologies (e.g. awareness creation, dissemination of information, network development) by SMEs

Potential partnerships

Partners for next wave Industry 4.0 Application Experiments

- ISVs
- Cloud / Technology providers
- HPC Centres
- Manufacturing SMEs

Competence Centres

Drivers of regional / national industry-related, innovation initiatives

Partners for H2020 and other projects

- Industry experts
- Research centres
- Startups, innovative SMEs

Contact

Thank you for your attention!
