

Hungarian applicants can take part in ERA-NET E-Rare-3 to research rare diseases

Preliminary information is communicated on the ERA_NET E-Rare-3 joint call foreseen to open on 5 December 2016. The aim of the E-Rare calls is to enable scientists in European countries to build an effective collaboration on a common interdisciplinary research project in rare diseases, based on complementarities and sharing of expertise, with a clear translational research approach, and also to realize the objectives of the International Rare Diseases Research Consortium (IRDiRC).

This year's call, to be announced in Hungary with the assistance of the NRDl Office, will expect pre-proposals in the field of innovative therapeutic approaches to be submitted by 1 February 2017.

Preliminary information and the details of the call is available on the E-Rare programme website:
