

Horizon 2020 info days and consultation events organised by the NRDl Office through 2017

In connection with Horizon 2020 calls, this year the NRDl Office organises more than 20 thematic information days and consultation events to facilitate the participation and success rate of domestic stakeholders in the competition for EU funds. At these events the experts of the NRDl Office provide information and practical advice, and they are also ready to answer questions arising throughout the application process. They also encourage sharing experience of others gained from previous applications, which are all useful and essential for a successful application in the competition for directly accessible European funds.

By autumn 2016, more than 437 applicant organisations received direct EU funding worth more than EUR 105 million for developing highly innovative, globally marketable products or services under the Horizon 2020 Programme – the RDI framework programme of the European Union between 2014 and 2020 – promoted by the NRDl Office as a professional contributor. To apply for these direct EU funds, applicants need to find their way through an extensive system of financial and legal rules. This is where [National Contact Points \(NCP\)](#) coordinated by the NRDl Office offers professional assistance to Hungarian applicants.
