**Invitation**

Dear Sir, Madam,

The European Commission in collaboration with EASME is organising an info-day on the open call for proposals on *"Capitalising the full potential of on-line collaboration"*. The call is launched under the H2020 – Innosup -2014-2015 programme (Industrial leadership pillar) and aims at facilitating the identification of suitable partners for innovation activities with the use of on-line support services.

At present there are different degree intermediaries which are already offering brokerage services, however only a small percentage of enterprises is using the available platforms or other on-line tools. The current call intends to offer the infrastructure for the revision and/or the initiation of new generation of support services that assist to create value from online collaboration with a group of contacts and potential partners (*"assistance to online collaboration for innovation"*).

The potential proposers will be expected to address one or more of the following aspects:

- develop and test new service designs for 'assistance to online collaboration for innovation' for SMEs in diverse sectors;
- make such new services accessible for enterprises in sectors that are typically not yet benefitting from innovation support;

Moreover, the nature of the topic – online collaboration – suggests training modules to be established as web-based self- or collaborative learning modules supported by case studies.

The total budget of the call is 2.350.000 Euro and a two stages approach is applied, the first stage deadline fixed on the 10/3/2015 and the second one on the 12/8/2015.

More information on the call is available at the [Horizon 2020 participants portal](#)
