Guide to ICT-related activities in WP

- Comprehensive coverage of the three H2020 pillars
- Detailed list of calls and topics
- Available on H2020 website

A guide to ICT-related activities in WP2018-20

ICT in H2020 – an overview

ICT is present in many of the H2020 areas. This guide is designed to help potential proposers find ICT-related topics across the different parts of H2020 in work programme 2018-20.

Like in previous work programmes (2014-15 and 2016-17), actions supported through the last phase of Horizon 2020 will cover the full innovation chain, from basic research to market uptake:

- Advanced research to uncover radically new technological possibilities and ICT contributions to upstream research and innovation are addressed in the 'excellent science' part of the work programme, respectively under 'future and emerging technologies' and 'European research Infrastructures' ('eInfrastructures');
- Research and innovation activities on generic ICT technologies either driven by industrial roadmaps or through a bottom-up approach are addressed in the 'leadership in enabling and industrial technologies' (LEIT) part of the work programme;
- Multi-disciplinary application-driven research and innovation leveraging ICT to tackle societal challenges are addressed in the different 'societal challenges'.

However, although the overall structure of this work programme is similar to previous ones, a few changes need to be taken into account:

- A new part is introduced to implement a pilot of the European Innovation Council (EIC), bringing together several innovation support schemes: the SME Instrument, the Fast Track to Innovation (FTI), FET Open, and Horizon Prizes. Each addresses the needs of a particular community in the innovation ecosystem.
 - Activities aiming at supporting innovative SMEs through the dedicated SME instrument are now all grouped together in a single fully bottom-up topic.
 - As part of the EIC pilot, FET Open should provide a bold exploratory engine that shatters the frontiers of current thinking, and aims at combining high scientific ambition with concrete technological implications.
- While the concept of focus area has been strengthened further, the 'cross-cutting activities' part introduced in the previous work programme is now replaced by virtually linked calls.
- A smaller number of major actions which cut across the programme boundaries are implemented as focus areas. Each of these aligns with major political or policy drivers, and is endowed with a substantial budget to allow for work of sufficient scale, depth and breadth. The linking of topics from different parts of the work programme is achieved through aligning aspects of the implementation such as proposal submission deadlines and evaluation procedures, and also putting in place measures to share information and create synergies between ongoing projects throughout the life-cycle (e.g. publicity, project monitoring). At the same time, the contributing calls and topics remain within the structure and logic of their respective work programme parts in Horizon 2020. Overall the expected effect is to get more from the same investment and build critical mass where it is needed.

Work Programme 2018-20

AZ INNOVÁCIÓ LENDÜLETE

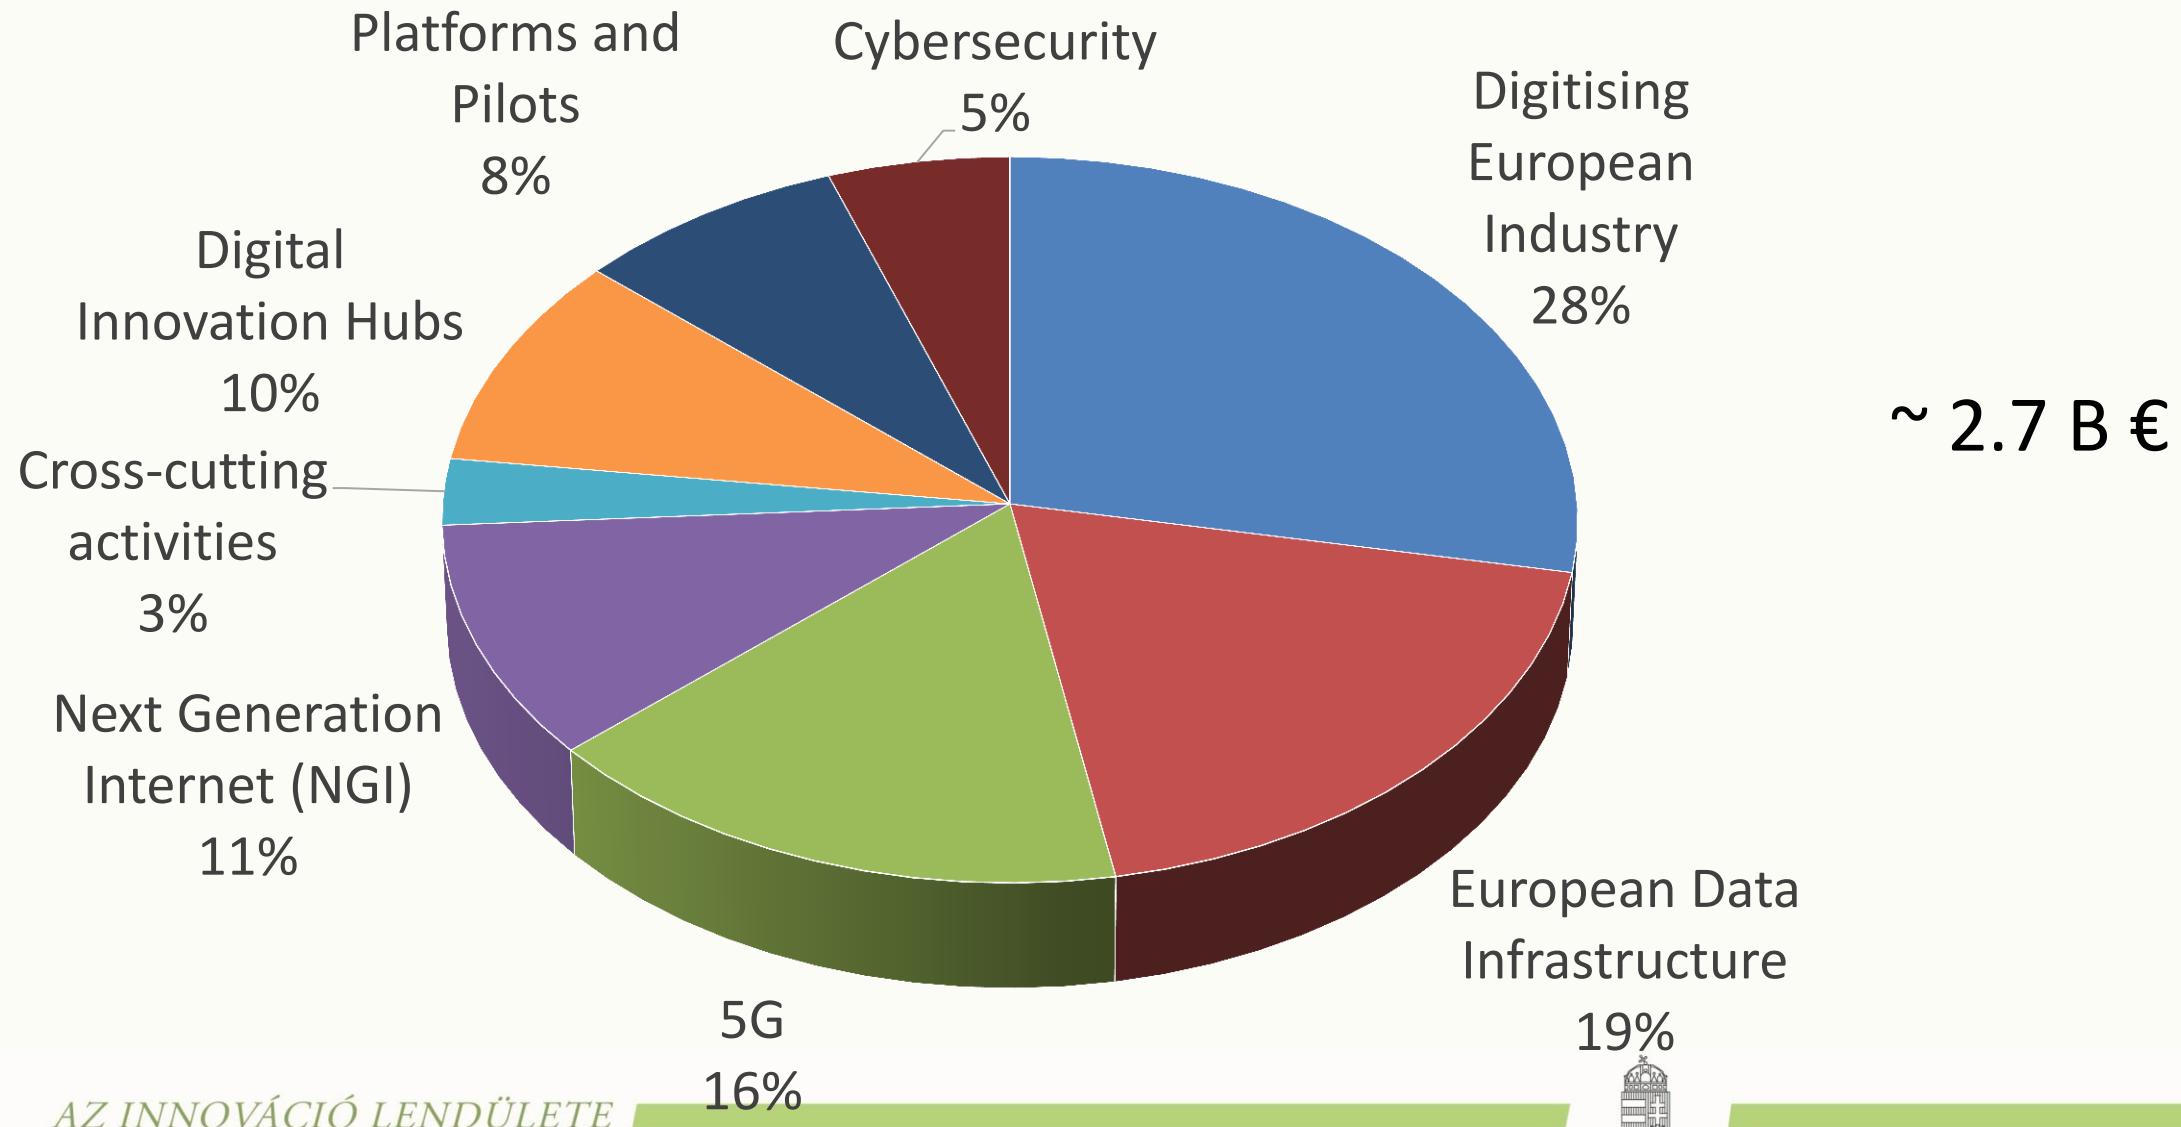

NEMZETI KUTATÁSI, FEJLESZTÉSI
ÉS INNOVÁCIÓS HIVATAL

Work Programme 2018 – 2020

- **Technologies for Digitising European Industry:**
LAE, photonics, nano-electronics, smart systems, manufacturing, robotics
- **European Data Infrastructure:**
HPC, Software, Big Data and Cloud technologies
- **5G**
- **Next Generation Internet (NGI):** Open Internet, AI, Interaction, IoT, language, inclusion, social connectivity
- **Cross-cutting activities:** STARTS, Start-up EU, PCP, fintech
- **Digitising and transforming European industry and services:**
 - Hubs
 - Platforms & Pilots
- **Cybersecurity:** cyber attacks, resilience, cybersecurity & privacy, quantum key

10 Public-Private Partnerships

- **Factories of the Future (FoF)**, to support the manufacturing industry through the development of sustainable production technologies and systems (1150 M€)
- **Energy-efficient Buildings (EeB)**, to increase the competitiveness and energy efficiency of the construction industry (600 M€)
- **European Green Vehicles Initiative (EGVI)**, to develop a competitive and resource efficient transport system with significantly less CO₂ emissions (750 M€)
- **Sustainable Process Industry (SPIRE)**, to make the process industry more resource- and energy-efficient (900 M€)
- **Photonics**, one of the key enabling technologies for our future prosperity and an essential element of many sectors, from energy and health, to everyday products like DVD players and mobile phones (700 M€)
- **Robotics**, a key driver of industrial competitiveness and essential to address key societal challenges in areas such as demographic change, health and well-being, food production, transport and security (700 M€)
- **High Performance Computing (HPC)**, which plays a pivotal role in stimulating Europe's economic growth and advancing European science (700 M€)
- **Advanced 5G networks for the Future Internet (5G)**, stimulate development of network internet infrastructure to ensure advanced ICT services for all sectors and users (700 M€)
- **Big Data Value PPP**, towards a data-driven economy in Europe (500 M€)
- **Cyber Security PPP** (450 M€)

- ICT Event 2018 – Vienna, Austria

Focus Area: Digitising & transforming European industry and services

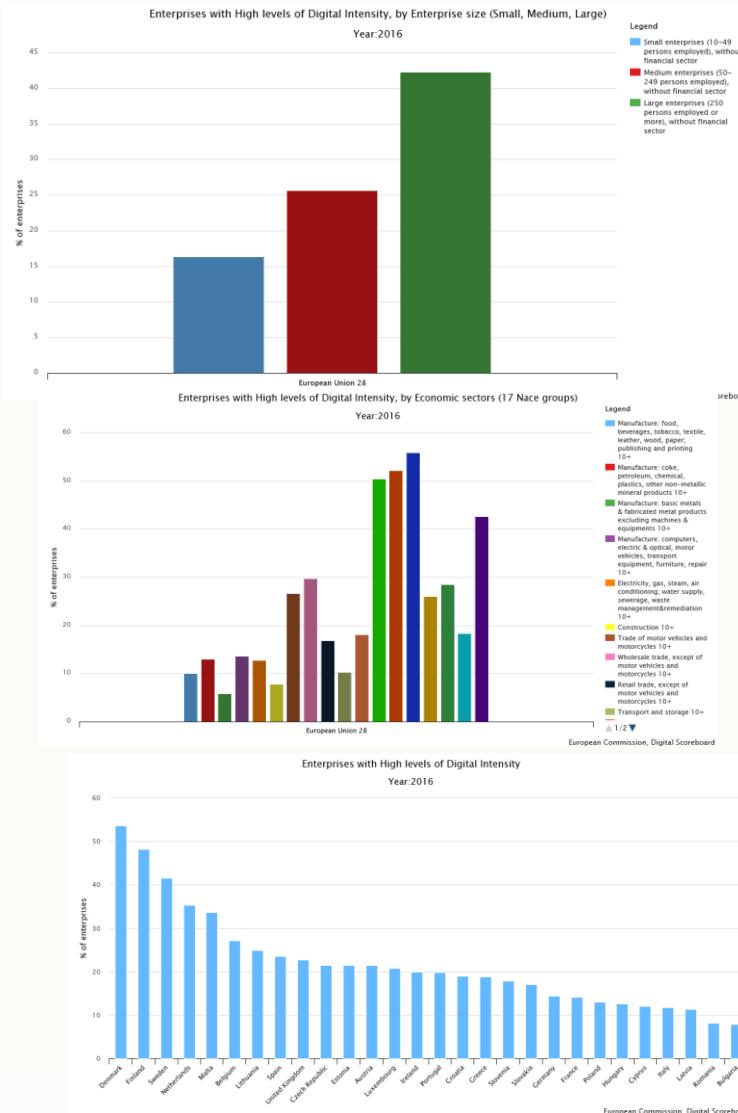

Mission

- ✓ Enabling all sectors and application areas to adapt, transform and benefit from digitisation, by allowing also smaller and newer players to capture value
- ✓ Develop industrial strategies, incl. new business models
- ✓ Connect to member states and regions, for synergies/align R&I agendas
- ✓ Removing barriers for innovation enabled by digitisation

Component

- ✓ Innovation hubs
- ✓ Cross-sectorial and integrated **digital platforms** and **large-scale pilots** for experimentation and co-creation with users

Levels of digitisation differ - size of company, sector, region

42% of large companies is highly digitised in the EU vs 16% of SMEs

56% of companies in computer programming, consultancy and information services are highly digitised.

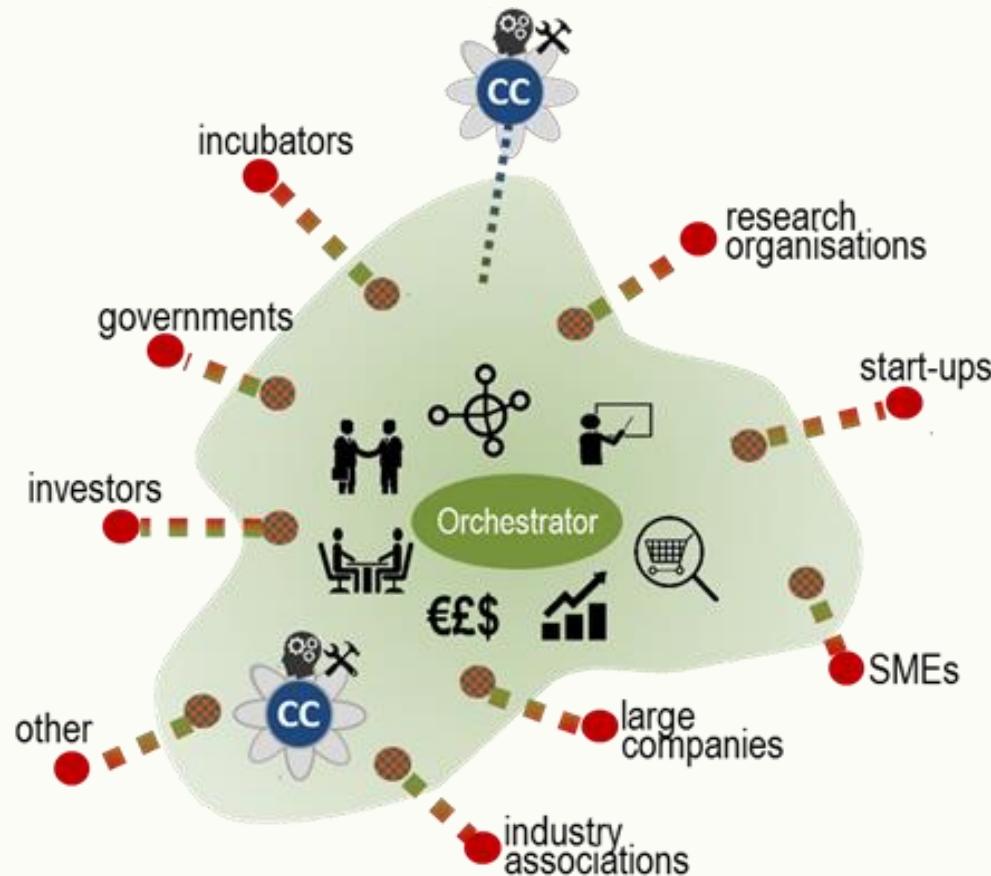

Only around 6% of companies in basic metals & fabricated metal products excluding machines & equipments are highly digitised.

53% of Danish companies are highly digitised vs 8% in Bulgaria and Romania

What is a Digital Innovation Hub?

A one-stop-shop providing services to companies in the region through a multi-partner cooperation:

- Access to Specialist Expertise and Infrastructure
- Brokering/matchmaking
- Awareness Creation around Digital Technologies
- Innovation Scouting
- Digital Maturity Assessment.
- Visioning and Strategy Development for Businesses
- Mentoring
- Training
- Access to Funding and Investor Readiness Services

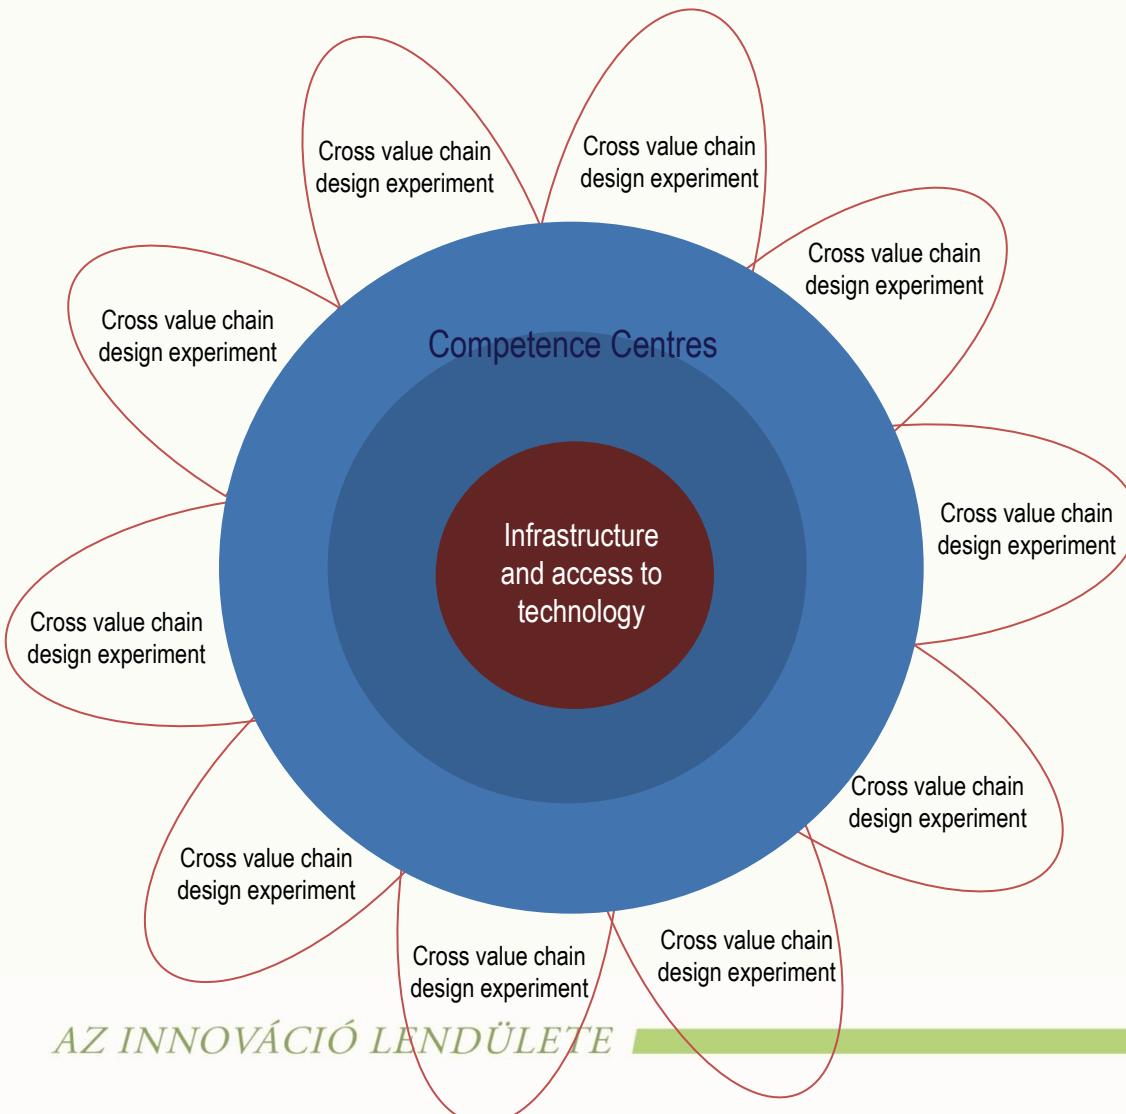

WP 2018 – 2020 - ICT

Focus area "Digitising and transforming European industry and services"
calls for digital innovation hubs

Innovation actions with the following characteristics:

- Consortia should be deeply rooted in **regional/national DIH**
- Critical mass of highly innovative, **cross border experiments**. At least 50% of the budget should **directly benefit SMEs** or slightly bigger companies.
- Activities should aim at **long-term sustainability** and include a business plan for the digital innovation hubs, a plan to attract investors, to address training and skills development needs and dissemination. Established networks reaching out to SMEs like the Enterprise Europe Network and the NCP network should be used.
- Selected projects are expected to collaborate on building a network of Digital Innovation Hubs, covering most regions in Europe.

Critical Mass of Cross-Border Application Experiments

Develop novel products or services with digital technologies.

Bring together actors along value chain.

Suppliers to assist new users in customising and applying digital technologies in their environment.

Financial support to third parties may be used for flexibility

Many projects are using FSTP to implement open calls in H2020

Digital Innovation Hubs

- Smart Anything Everywhere (SAE), (CPS, SSI, MNT)
- I4MS (phase 4) - uptake of digital game changers and digital manufacturing platforms
- Photonics
- Robotics (healthcare, infrastructure, agri-food, production)
- Big Data Innovation Hubs
- Digital Innovation Hub network

Digital Innovation Hubs in SC2

Digital Industrial Platforms

What do we mean?

✗ *A place or opportunity for public discussion*

e.g. European Platform of National Initiatives

✓ *An operating system that integrates different technologies and various applications and services*

✗ *Online platforms
in the consumer world*

e.g. Facebook, Nest, Android

✓ *Industrial platforms
in the business world*

In different ways and to varying degrees they may take in:

- 1) a **community** role
- 2) an **infrastructure** role
- 3) a **data** role

Digital Industrial Platforms

Alignment of R&I efforts

**EU actors join forces along common interests
Future global standards & platforms driven by interests of EU actors**

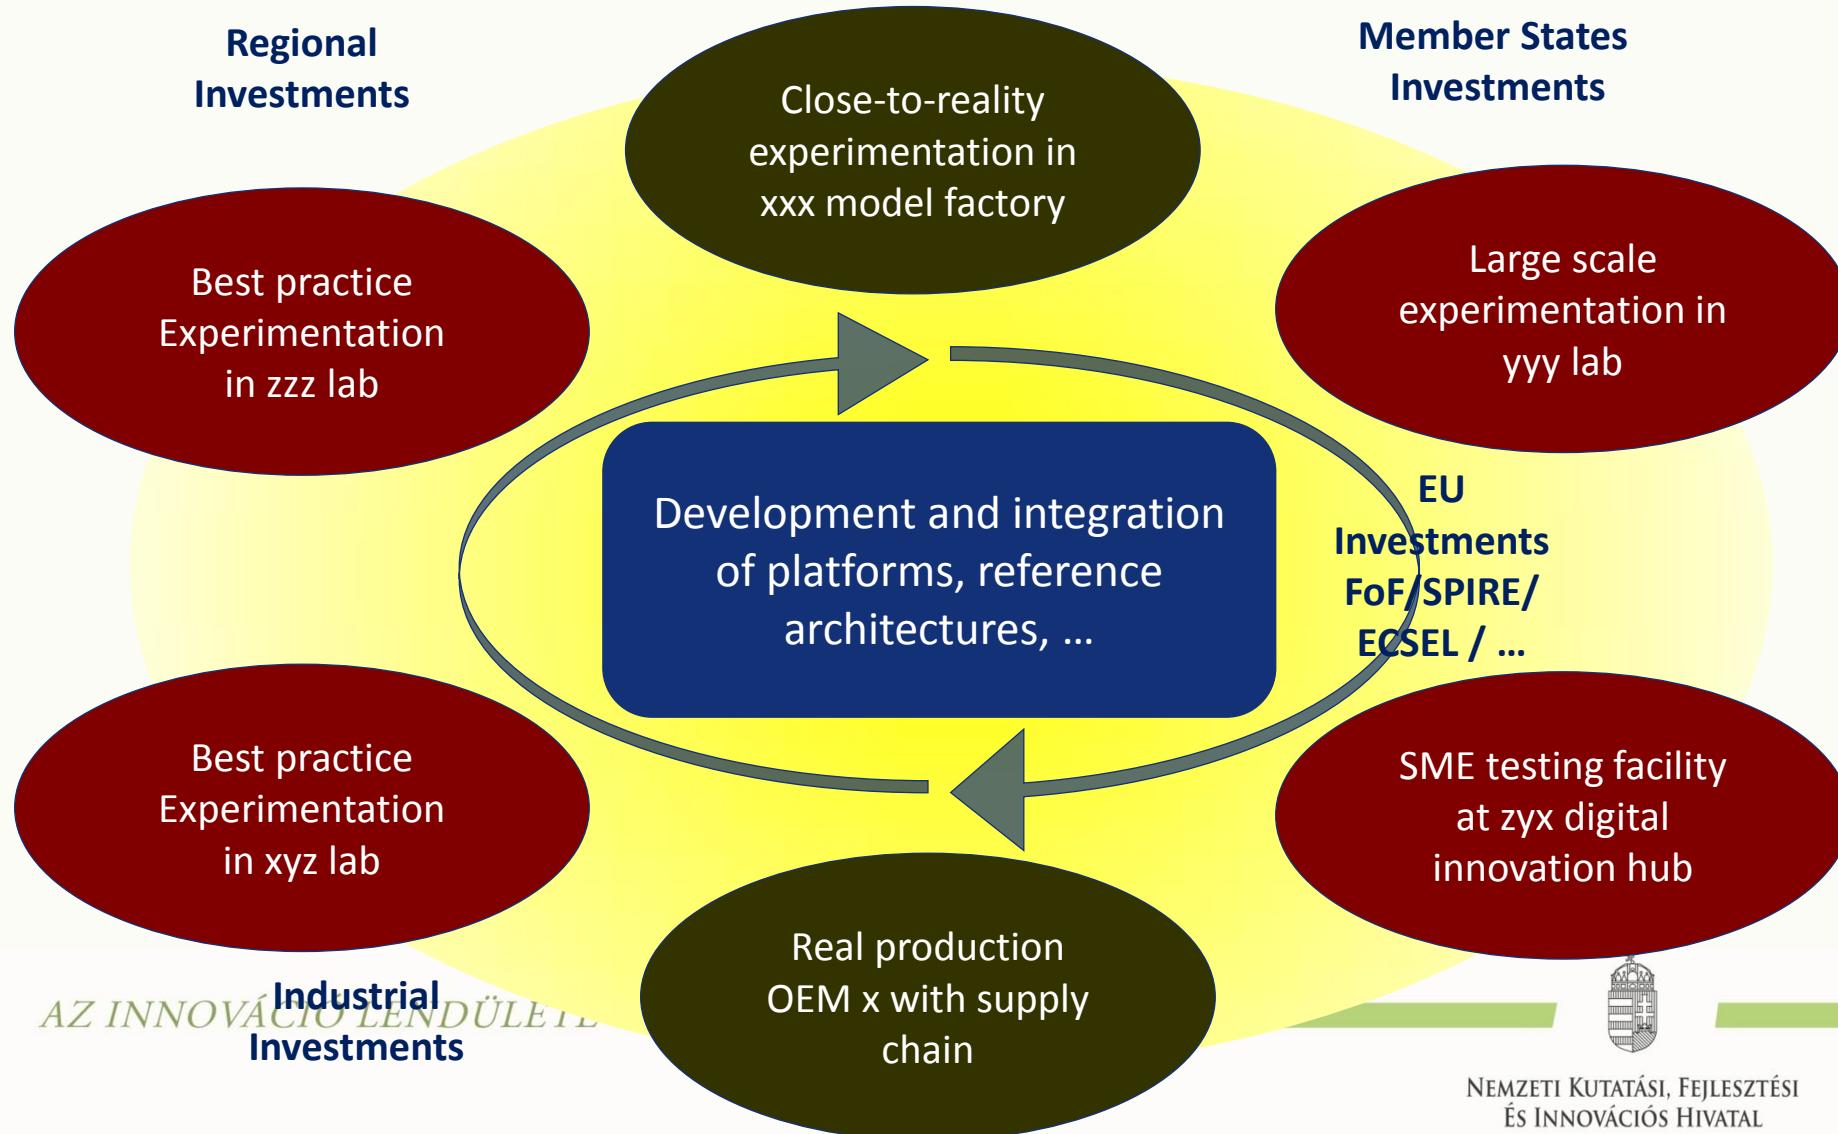

Focus investments on:

- Integration of key digital technologies
- Digital industrial platforms, reference architectures, ...
- Reference implementations, large-scale piloting, experimentation environments
- Ecosystem building and standardisation

Digital Industrial Platforms

Pooling Investments

WP 2018-2020

Topics pan-European platform-building and piloting

Digital Manufacturing Platforms

- Agile Value Networks: Lot-size One
- Zero-defect Processes and Products
- Machines & Human Competences
- Sustainable Value Networks

A digital 'plug and produce' online equipment platform for manufacturing

...

Agricultural Digital Integration Platforms

- Optimize farm operations
- High-precision farming

Digital Service Platforms for Rural Economies

...

Smart Hospital of the Future

Smart and Healthy Living at Home

- Healthy & independent living
- Early risk detection and intervention

...

Interoperable and Smart Homes and Grids

Big Data Solutions for Energy
