

# Industry 4.0 @ Bosch Rexroth

Daniel Prekel

Head of Engineering & Project business

### Lead Provider

Drive and Control Technology

Bosch Software Innovations

Bosch Assembly Systems  
and Special Machinery

Bosch Connected Devices & Solutions

### Lead User

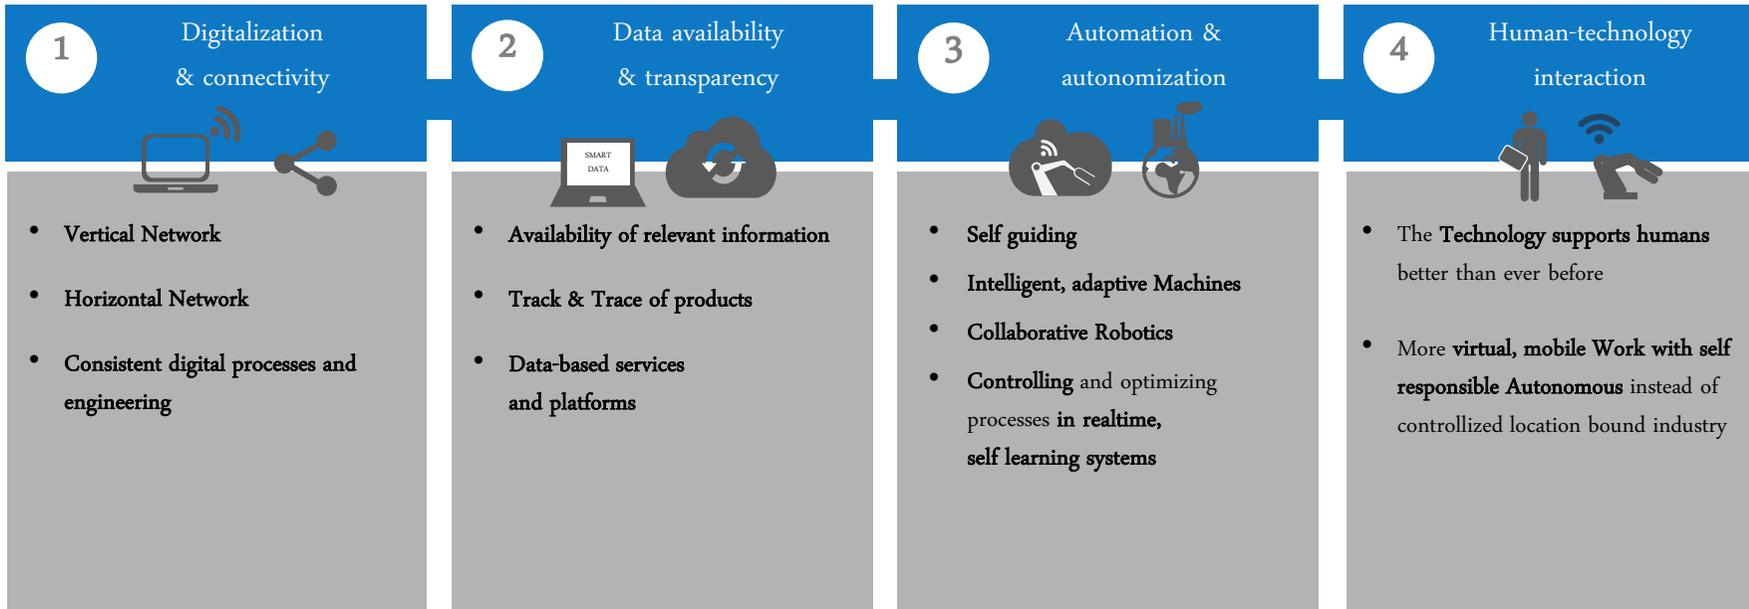

250 Bosch plants world wide

- **Manufacturer of products**
- **Machine operator**
- **Plant operator**
- **Interface to customers/suppliers**

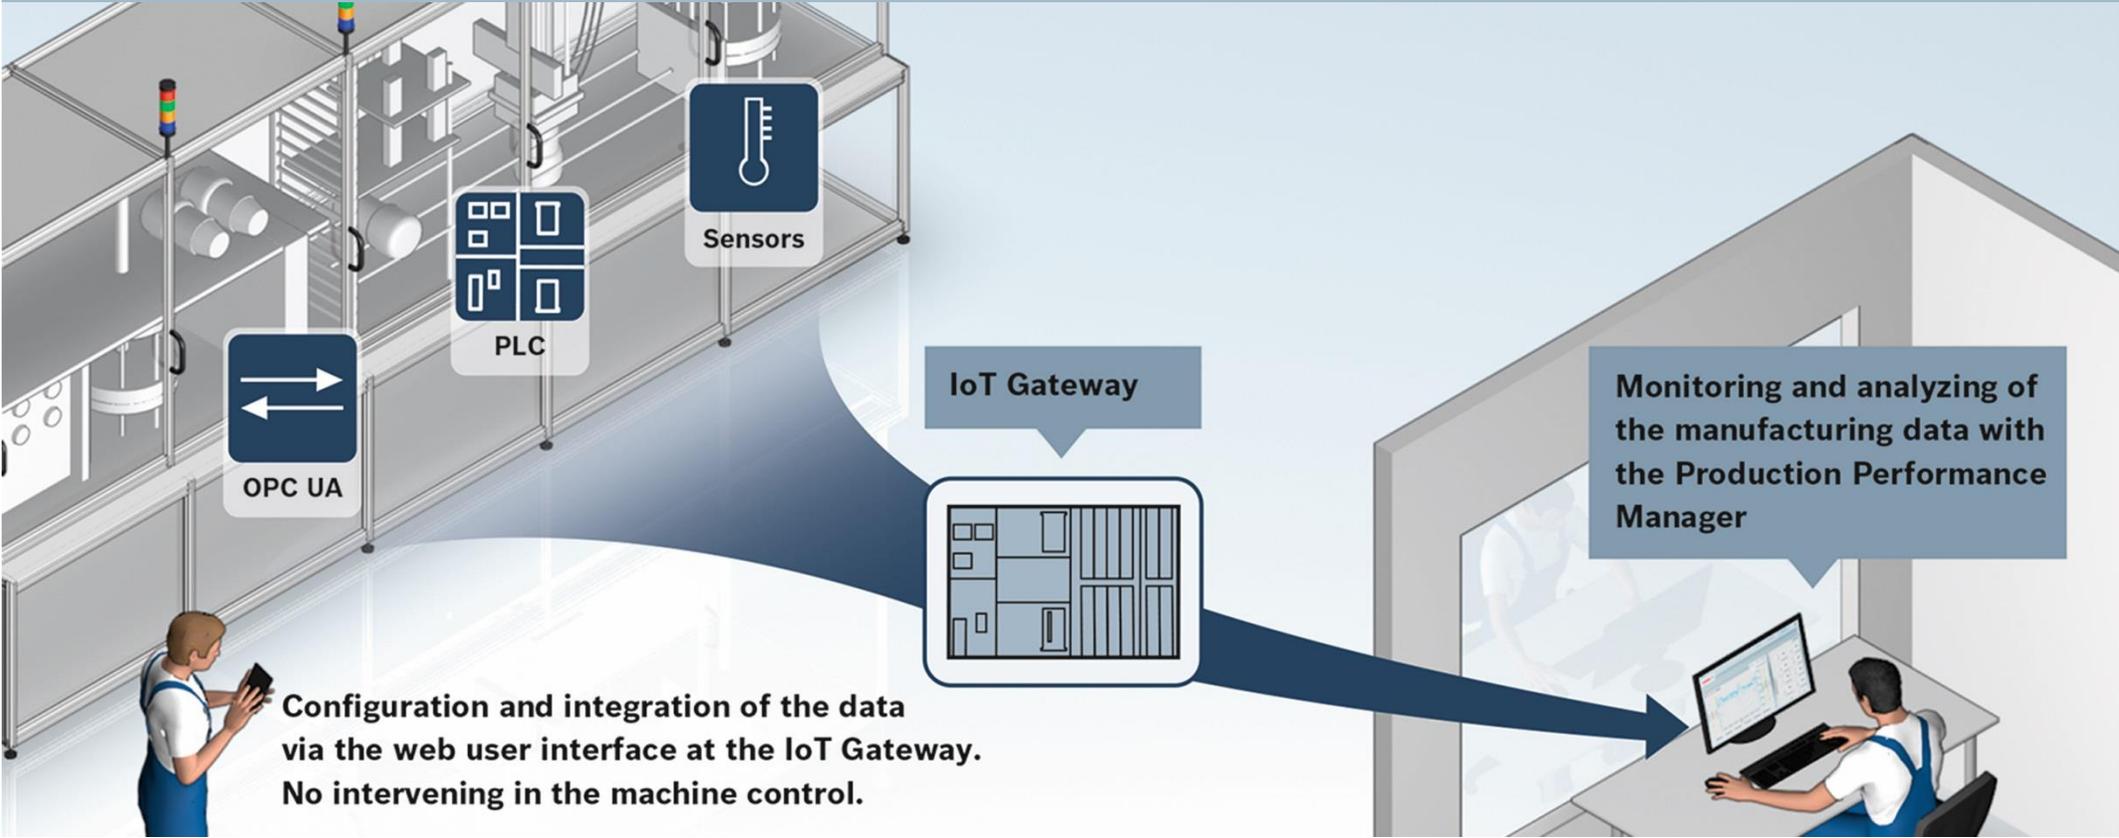

More than 50 pilot projects for Connected Industry initiated

# Industry 4.0 @ Bosch Rexroth

## What characterizes Industry 4.0?

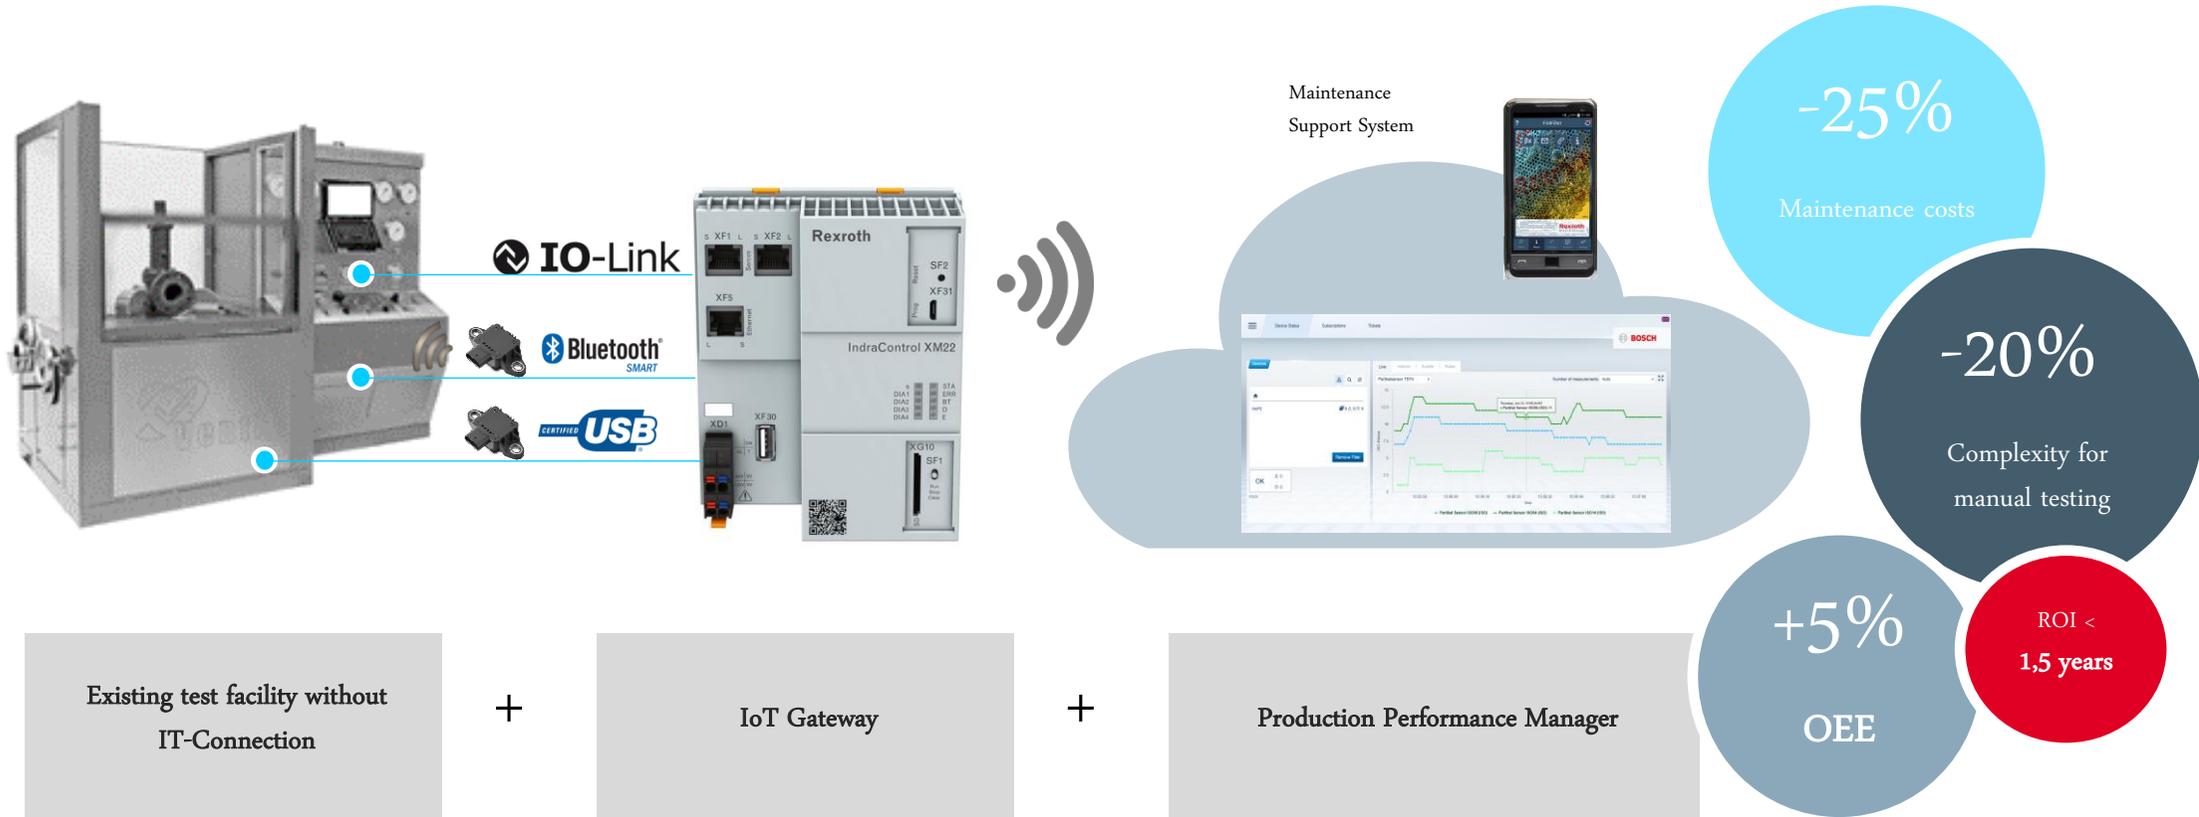

For a fast way in to Industry 4.0, start by monitoring and analyzing your manufacturing data

## Use Case: IoT Gateway at Bosch Rexroth

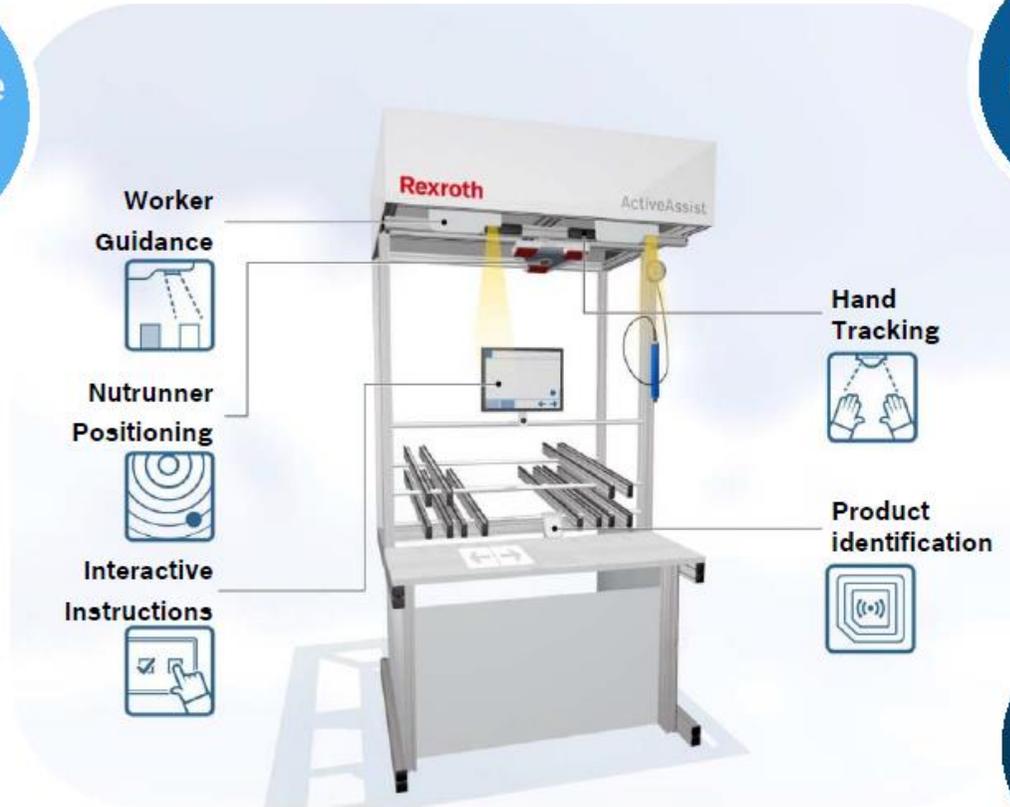

Monitoring of lubricants and filters and compliance with the ISO cleanliness level

OEE: Overall Equipment Effectiveness

# Active Assist Industry 4.0 Workplace

Freely  
configurable  
and  
adaptable

Ergonomic

Assembly  
data  
documen-  
tation

Reduced  
failure costs

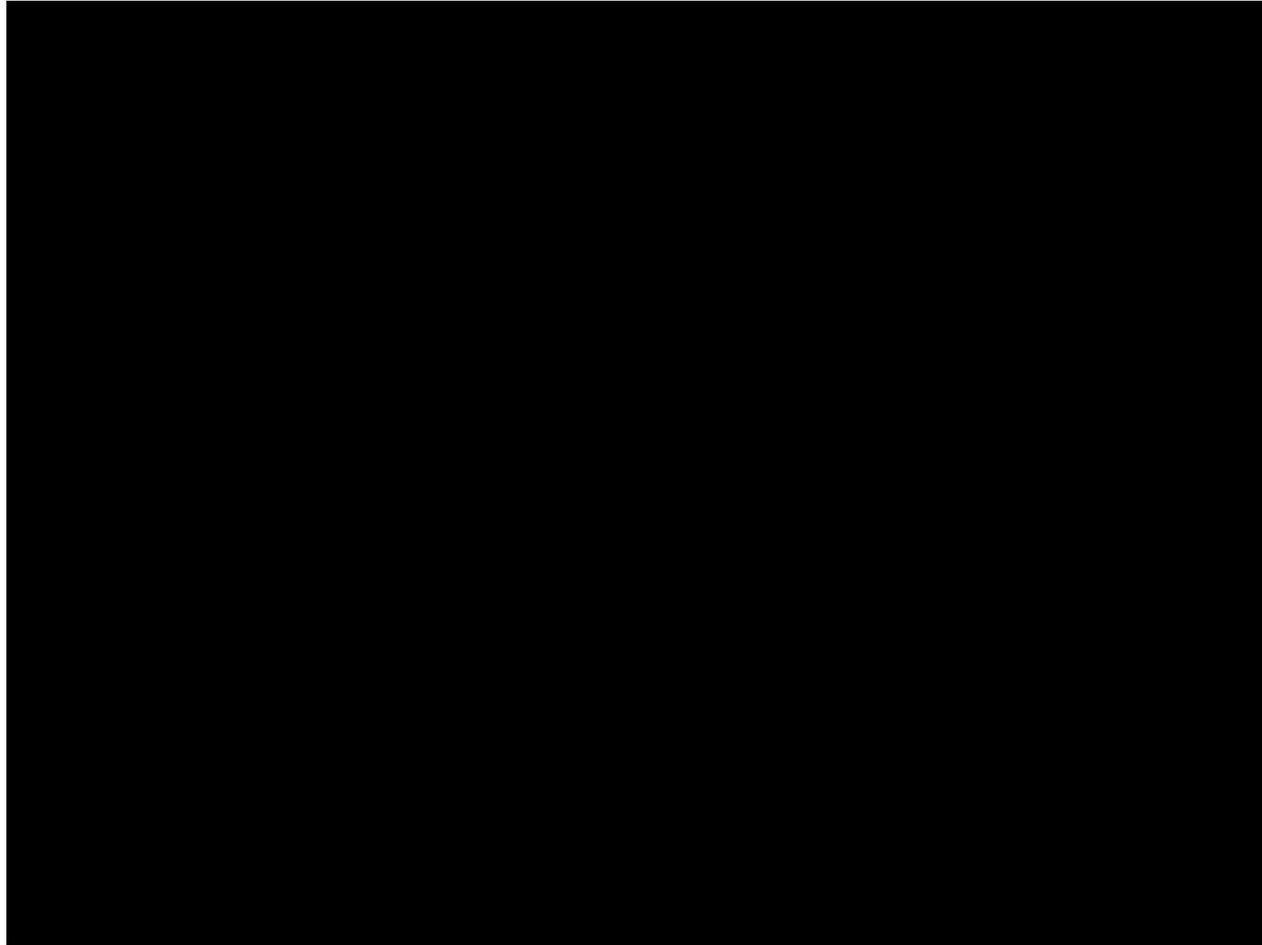

Interactive  
guiding of  
assembly  
steps

- Assembly steps assistant
  - projected by data projector
  - leaded by pick to light
  - refers Information to the employee (language, know how)
- Assembly step guide
  - tool tracking by ultrasound
  - Hand – detection and –pursuing by 3D camera
  - torque transfer and data feedback via WLAN
- Augmented reality
  - Assembly steps are pictured by data glasses
  - virtual buttons

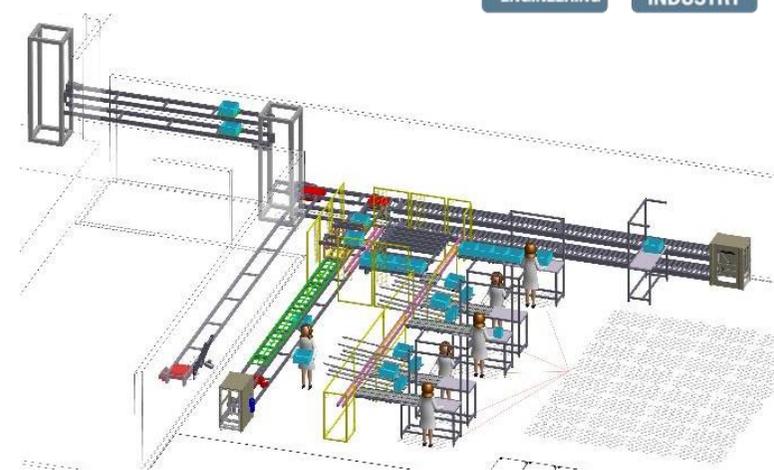

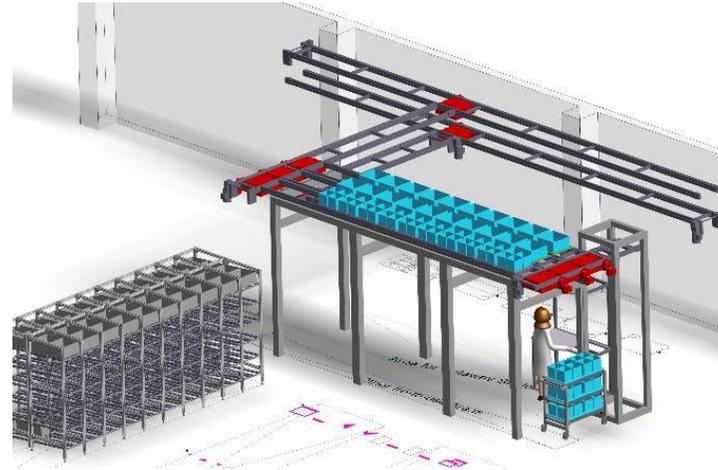

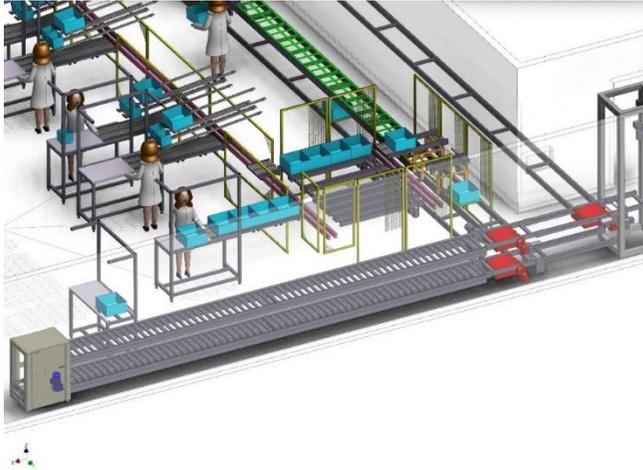

# Industry 4.0 @ Bosch Rexroth

## Multi-Product Line at plant Homburg, Germany

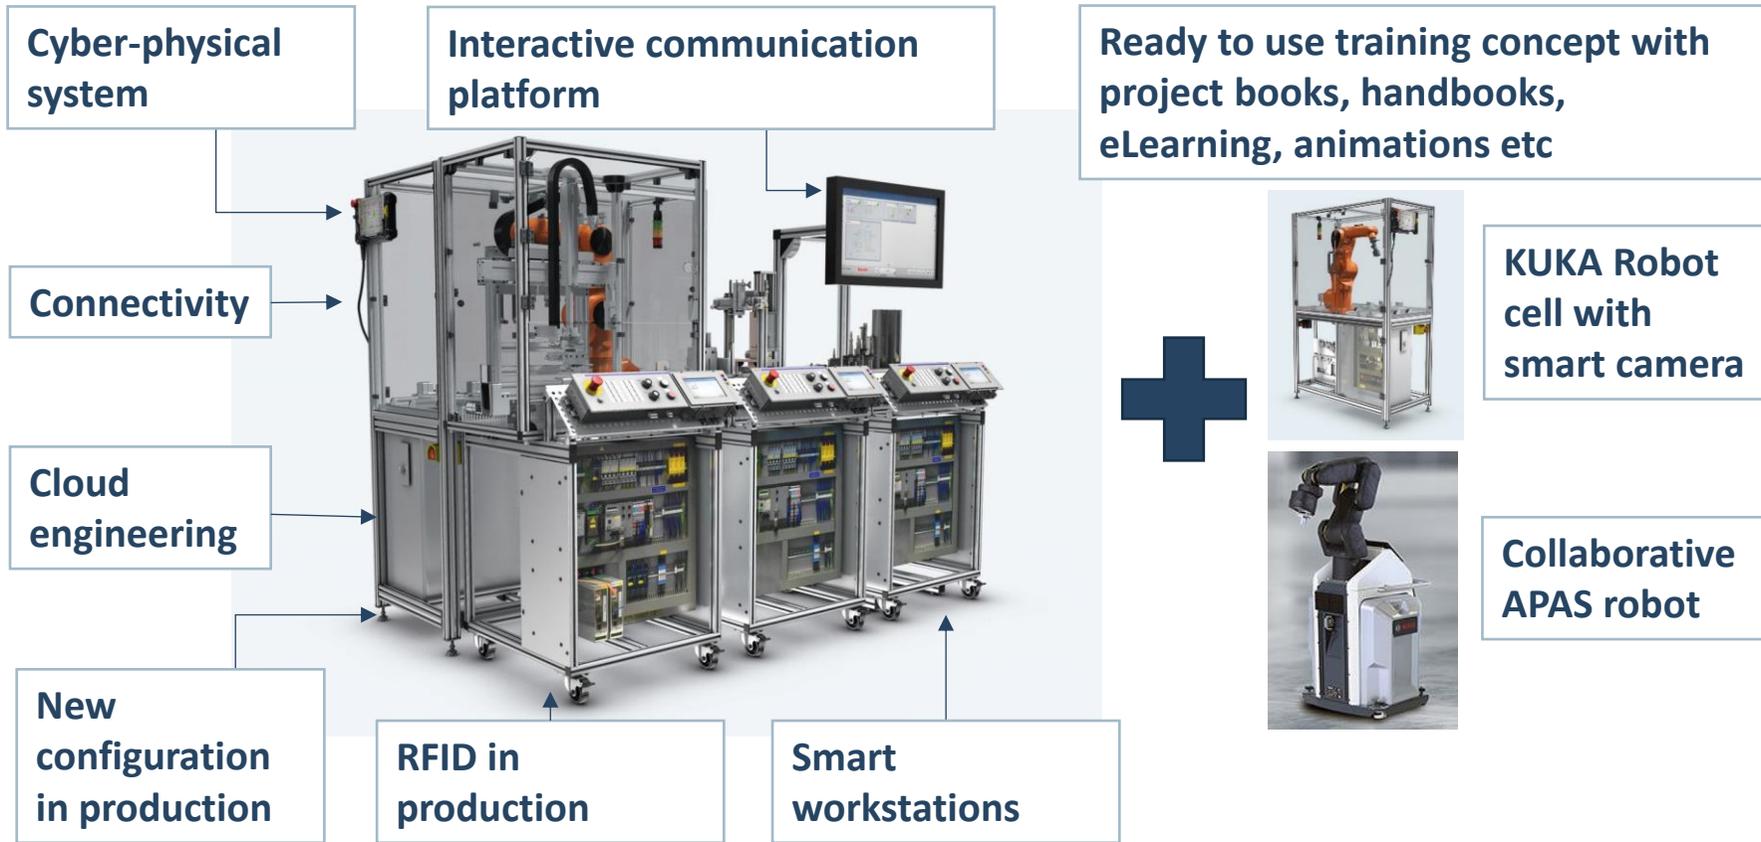

## i4.0 consignment stock for SMD parts

- 300m conveyor system with 6 lifting units
- Automatic put-away wagon filling system
- Humanless booking with SAP connection via WebConnector
- Rfid bracelet for warehouse operations
- Pick-to-light system for production material flow

## mMS4.0 Training System

A whole factory in miniature: understand and learn Industry 4.0

**→ Support the people as key player**

**Industry 4.0 does not have a part number...**

**→ Use data out of connectivity**

The diagram features six icons in dark blue squares: a network of nodes, a bidirectional data flow with binary code, a central node with four ports, a bidirectional data flow with binary code, a circular data flow with binary code, and a factory with a padlock.

# Thank you for your attention!
