A HORIZONT EURÓPA PROGRAM FELÉPÍTÉSE

THREE PILLARS FOR IMPLEMENTATION

**Pályázati lehetőségek a Horizont Európa 1. klaszter munkaprogramban
(Horizon Europe Cluster 1. – egészség)**

CL1 DESTINATION 1: Staying healthy in a rapidly changing society (2026 – 2027)

- HORIZON-HLTH-2026-01-STAYHLTH-02 – Behavioural interventions for NCD prevention among young people (RIA)
- HORIZON-HLTH-2026-01-STAYHLTH-03 – Building public trust and outreach in the life sciences (CSA)
- HORIZON-HLTH-2027-01-STAYHLTH-01 – Addressing disabilities through the life course to support independent living and inclusion (RIA)

Behavioural interventions as primary prevention for NCDs among young people

HORIZON-HLTH-2026-01-STAYHLTH-02

Program:	Horizon Europe Cluster 1
Típus:	Research and Innovation Actions
TRL szint:	nem releváns
Támogatás projektenként:	9 - 10 M EUR
Támogatott projektek száma:	2
Pályázati felület megnyílik:	2026.02.10.
Beadási határidő:	2026.04.16.
Felhívás linkje:	LINK

This topic aims at supporting activities that are enabling or contributing to one or several expected impacts of destination “Staying healthy in a rapidly changing society”. To that end, proposals under this topic should aim to deliver results that are directed at, tailored towards and contributing to most of the following expected outcomes:

- Healthcare professionals have access to behavioural interventions that can be used to establish and reinforce healthy habits and sustain behavioural changes.
- Health professionals and educators have access to strategies to mitigate risks of Non-Communicable Diseases (NCDs) for youth, with clear metrics that can be used to assess health outcomes.
- Youth have increased individual responsibility through targeted education, digital services, including easily accessible tools for self-monitoring, and community-based support, stemming from increased collaboration between healthcare professionals, educators and families.
- Researchers have access to Real-World Data (RWD) , existing health data infrastructure and digital tools, including Artificial Intelligence (AI), which can contribute to the sustained success of behavioural health interventions.
- Policymakers at local, regional, national and EU levels have new knowledge on behavioural interventions on NCDs among youth, which they can use to improve interventions in diverse European contexts.

The focus of this topic is human-centred on persons with long-term disabilities -physical, mental, intellectual or sensory- aiming at supporting independent living across the life-course from a health perspective. Persons with disabilities have an equal right to live independently and be included in the community. Independent living requires a differentiated landscape of quality, accessible, person-centred and affordable, community- and family-based services comprising personal assistance, medical and social care and interventions by social workers, thereby facilitating everyday activities and providing choice to persons with disabilities and their families .

The objective of this topic is to explore new ways to promote independent living and inclusion in society of persons with disabilities, reducing the impact of barriers faced in their daily lives, and supporting the transition from institutions to living in the community while addressing all-encompassing aspects of personal support, such as community transformation, service provision, assistive and accessible technologies and environments.

CL1 DESTINATION 2: Living and working in a health-promoting environment (2026-2027)

- HORIZON-HLTH-2026-01-ENVHLTH-01 – Towards a better understanding and anticipation of the impacts of climate change on health (RIA)
- HORIZON-HLTH-2026-01-ENVHLTH-04 – Towards climate resilient, prepared and carbon neutral populations and healthcare systems (RIA)
- HORIZON-HLTH-2026-01-ENVHLTH-05 – Support for a multilateral initiative on climate change and health research (CSA)
- HORIZON-HLTH-2027-01-ENVHLTH-02 – Integrating climate-related exposures into the human exposome and characterising its changes in response to climate change (RIA)
- HORIZON-HLTH-2027-01-ENVHLTH-MISSCLIMA-03 – Tools and technologies to support health adaptation to climate change (PCP)

Towards a better understanding and anticipation of the impacts of climate change on health

HORIZON-HLTH-2026-01-ENVHLTH-01

Program:	Horizon Europe Cluster 1
Típus:	Research and Innovation Actions
TRL szint:	nem releváns
Támogatás projektenként:	7 - 8 M EUR
Támogatott projektek száma:	7
Pályázati felület megnyílik:	2026.02.10.
Beadási határidő:	2026.04.16.
Felhívás linkje:	LINK

The climate crisis poses an existential challenge to planetary and human health with larger effects on vulnerable populations, groups and regions. Climate change increases the incidence of non-communicable diseases and the prevalence of mental health conditions and facilitates the emergence and spread of infectious diseases. Climate change can act as a risk multiplier and exacerbates existing health conditions and vulnerabilities.

In general, proposals should develop approaches to prevent and reduce the impacts of climate factors in the studied health outcomes and increase population and workforce resilience. Applicants should explicitly state in their proposal which of the three abovementioned broad focus areas they target. The proposed work should address only said specific area (with possible exceptions if the reasoning is clearly explained). A One Health approach should also be applied where relevant.

Integrating climate-related exposures into the human exposome and characterising its changes in response to climate change

HORIZON-HLTH-2027-01-ENVHLTH-02

Program:	Horizon Europe Cluster 1
Típus:	Research and Innovation Actions
TRL szint:	nem releváns
Támogatás projektenként:	10 - 11 M EUR
Támogatott projektek száma:	4
Pályázati felület megnyílik:	2027.02.10.
Beadási határidő:	2027.04.13.
Felhívás linkje:	

[LINK](#)

The exposome is the totality of exposures (and their interactions) experienced by an individual throughout their lifetime, including chemical, physical, biological, nutritional and psychosocial factors, from conception onwards. Many of these factors originate in the environment, including climate-related exposures such as extreme heat, heightened air pollution or drought. Climate change may amplify or interact synergistically with other better-established exposures, dynamically altering the human exposome and its health implications. Despite this, climate factors remain underrepresented in large-scale human exposome studies.

Research activities under this topic should strengthen the use of the exposome approach to study global exposures and generate evidence on their health implications. Proposals should focus on integrating climate-related factors into exposome research and understanding how the exposome changes in response to climate change. Moreover, research activities should be multiscale and multidisciplinary and account for the complexity and multifactorial nature of health determinants and the most pressing unmet medical needs in relation to environmental degradation and disrupted ecosystems. Proposals should include climate-relevant social determinants of health as part of their proposed activities.

CL1 DESTINATION 3: Tackling diseases and reducing disease burden (2026)

- HORIZON-HLTH-2026-01-DISEASE-02 – Innovative interventions to prevent the harmful effects of using digital technologies on the mental health of children and young adults (RIA)
- HORIZON-HLTH-2026-01-DISEASE-03 – Advancing research on the prevention, diagnosis, and management of post-infection long-term conditions (RIA)
- HORIZON-HLTH-2026-01-DISEASE-04 – Development of novel vaccines for pathogens with epidemic potential (RIA)
- HORIZON-HLTH-2026-01-DISEASE-09 – Multisectoral approach to tackle chronic non-communicable diseases: implementation research maximising collaboration and coordination with sectors and in settings beyond the healthcare system (GACD) (RIA)
- HORIZON-HLTH-2026-01-DISEASE-11 – Understanding of sex and/or gender-specific mechanisms of cardiovascular diseases: determinants, risk factors and pathways (RIA)
- HORIZON-HLTH-2026-01-DISEASE-15 – Scaling up innovation in cardiovascular health (CSA)

Advancing research on the prevention, diagnosis, and management of post-infection long-term conditions

HORIZON-HLTH-2026-01-DISEASE-03

Program:	Horizon Europe Cluster 1
Típus:	Research and Innovation Actions
TRL szint:	nem releváns
Támogatás projektenként:	6 - 8 M EUR
Támogatott projektek száma:	5
Pályázati felület megnyílik:	2026.02.10.
Beadási határidő:	2026.04.16.
Felhívás linkje:	LINK

Proposals should aim to develop innovative approaches for the prevention, diagnosis, and management of post-infection conditions. Proposals should address most of the following research areas:

- Identify protective and risk factors associated with the development of post-infection conditions to inform targeted prevention strategies, by integrating relevant information such as genetics, epigenetics, immune or inflammatory responses, and/or other relevant factors.
- Increase understanding of the pathophysiology of post-infection conditions (including inflammatory aspects) to identify biomarkers and develop clinically validated diagnostic approaches for early detection, disease progression and/or treatment optimisation.
- Develop and validate preventive and/or therapeutic interventions, including targeted pharmacological treatments, repurposing of existing drugs or precision medicine approaches, through early-stage clinical trials that demonstrate clinical safety and efficacy.
- Identify effective supportive rehabilitation approaches, including physical therapy, cognitive interventions, and psychological support, to enhance patient recovery, mental health and quality of life and evaluate their effectiveness.
- Examine best practices for integrating post-infectious disease management into primary and specialised healthcare settings, improving coordination among healthcare professionals.

This topic aims at supporting activities that are enabling or contributing to one or several expected impacts of destination “Ensuring equal access to innovative, sustainable, and high-quality healthcare”. To that end, proposals under this topic should aim to deliver results directed towards and contributing to all the following expected outcomes:

- Healthcare professionals, at all stages of healthcare provision, have access to user-centric, robust and trustworthy virtual assistant solutions based on Generative Artificial Intelligence (AI) models and other AI tools to support them towards the provision of safer, more efficient and personalised care.
- Healthcare professionals benefit from cross-country applicable methodologies with the aim to facilitate acceptability, healthcare uptake and public trust of virtual assistant tools based on Generative AI models.
- Patients benefit from enhanced outcomes, more personalised care, and increased engagement with their healthcare professionals, leading to improved safety, quality of care, access to appropriate healthcare information and patient-doctor communication.
- Healthcare systems benefit from improved cost-effective patient outcomes, superior to standard of care in terms of accuracy, safety, and quality, and from cost-savings through advancements in highly accurate, transparent, traceable, and explainable solutions.

Proposals should address most of the following aspects:

- Contribute to further the understanding on the structural, hormonal, and/or biological distinctions between sexes/genders to improve diagnostics and therapeutics for CVDs.
- Develop sex and/or gender-specific tailored risk models in a view of better prevention, detection and diagnostic, and treatment strategies.
- Identify and/or validate novel or existing sex and/or gender-specific health determinants, risk factors and pathways for cardiovascular disease(s) through the generation, integration and validation of data derived from relevant disciplines (e.g. molecular biology, behavioural science, nutrition, clinical, social and environmental epidemiology; exposure sciences; genetics and epigenetics, etc.).
- Make use of existing health data, including registries or cohorts, and/or assess the necessity to establish new ones, as well as, where relevant, exploit the knowledge gained from population-based biobanks. In case of the generation of new data, it should be managed in line with the FAIR principles, when relevant. (See definition of FAIR data in the introduction to this Work Programme part.)

CL1 DESTINATION 3: Tackling diseases and reducing disease burden (2027)

- HORIZON-HLTH-2027-01-DISEASE-05 – Development of novel broad spectrum small molecule antiviral therapeutics for pathogens with epidemic potential (RIA)
- HORIZON-HLTH-2027-01-DISEASE-06 – Development of monoclonal antibodies to prevent and treat infections from Flaviviridae (RIA)
- HORIZON-HLTH-2027-01-DISEASE-07 – Development of monoclonal antibodies to prevent and treat infections from Filo-, Nairo-, Phenui-, Picorna- and Toga Viridae (RIA)
- HORIZON-HLTH-2027-01-DISEASE-08 – Development of innovative antimicrobials against critical pathogens resistant to antimicrobials (RIA)
- HORIZON-HLTH-2027-01-DISEASE-10 – Prevention and management of chronic non-communicable diseases in children and young people (GACD) (CSA)
- HORIZON-HLTH-2027-02-DISEASE-01 – Innovative healthcare interventions for non-communicable diseases (RIA two stage)
- HORIZON-HLTH-2027-02-DISEASE-14 – Clinical trials for advancing innovative interventions for neurodegenerative diseases (RIA two stage)

Innovative healthcare interventions for non-communicable diseases

HORIZON-HLTH-2027-02-DISEASE-01-two-stage

Proposals should address all the following aspects:

- Perform rigorous early stage clinical trial(s) to validate novel or refined healthcare interventions for treatment and/or disease management solutions for patients suffering from the following specific NCDs: cardiovascular diseases, diabetes, chronic respiratory diseases or chronic kidney diseases. (...) Existing co- and multimorbidities should be addressed in the trial design.
- Clinical trial(s) should be supported by completed proof-of-concept of clinical safety and efficacy.
- Both preclinical research and the draft clinical trial protocol should be completed at the time of submission of the proposal. Proposals should also demonstrate evidence of preliminary consultations with ethics and regulatory authorities at the time of submission.
- Use and/or develop technologies, including digital ones (e.g. (generative) Artificial Intelligence, wearable technologies) to help implement and monitor the long-term efficacy of the intervention(s), as well as manage the disease and/or monitor their progression (e.g. with unobtrusive technologies suitable for patient monitoring at home and in real-world conditions), whilst also ensuring they are bias-free, inclusive, and ethically sound. Hardware and software should be interoperable in line with internationally accepted standards. The use of virtual human twins could also be considered, where relevant.

[LINK](#)

Infectious diseases remain a major threat to health and health security in the EU and globally. Viral disease emergence is already being accelerated by climate change, and thus a proactive approach to the development of antiviral prophylactics and therapeutics in preparedness for future infectious disease outbreaks is needed. The availability of broad-spectrum antivirals targeting conserved viral or host mechanisms would provide a critical preparedness measure against future health threats caused by (re)emerging infectious disease epidemics or pandemics, due to infectious disease epidemics or pandemics. Antibodies and antibody derived proteins are excluded from the scope of this topic. (...)

Proposals should thus aim to diversify and accelerate the global prophylactic and therapeutic research and development portfolio for emerging and re-emerging viral infections, and to strengthen the leading role of the EU in prophylactic and therapeutic research and development.

Research activities under this topic should make use of the constantly improving health technologies and data analytics that provide new opportunities to address these issues more effectively, by better integrating medication management into healthcare practices, including into Electronic Health Records (EHR) and decision support systems.

Identifying and validating relevant biomarkers for better patient stratification can contribute to significantly decreasing the risk of adverse drug reactions. Biomarkers can also help to detect adverse drug reactions early before occurrence of clinical symptoms and enable early countermeasures. Generating knowledge on the interaction and complexity of biochemical pathways can improve the understanding of patients' response to ADRs and thus provide better tailored treatments and early responses to adverse reactions.

Proposals under this topic should aim to deliver results that are directed at, tailored towards and contributing to several of the following expected outcomes:

- Researchers are in possession of improved human-relevant New Approach Methodologies (NAMs) platforms that capture the genetic, phenotypic, age-related, immune, microbiome, and environmental exposure variability of the human population. These innovations support more equitable healthcare solutions and personalised treatment strategies across diverse life stages.
- Industry gets access to platforms that allow a faster pace of innovation for the development of more cost-effective targeted therapeutic interventions and improvement of the safety assessment of chemicals, other medicinal products, and medical devices.
- Patients benefit from innovative platforms and strategies that improve prediction, prevention and treatment of diseases, in particular through enhanced understanding of disease pathways and mechanisms.
- The general population is better protected through a safer environment, as these platforms enhance the detection and mitigation of risks posed by chemicals and other potentially harmful substances.

Típus:	Research and Innovation Actions
TRL szint:	nem releváns
Támogatás projektenként:	4 - 6 M EUR
Támogatott projektek száma:	4
Pályázati felület megnyílik:	2026.02.10.
Beadási határidő:	2026.04.16.
Felhívás linkje:	LINK

Proposals can cover all types of health technologies, aiming to define improved and novel sources of evidence with proven relevance for regulatory decision-making with a focus on safety and performance throughout their lifecycle, i.e. throughout the continuous process of clinical evaluation. To this end, proposals should address either, or a combination of the following: i) the improvement of existing methodologies and their fitness to specific types or classes of health technologies, including methodology for regulatory assessment and ii) explore and examine to which extent novel information sources as indicated above can be considered as evidence that is satisfactory in view of regulatory needs concerning safety and performance.

Proposals should support the update and refinement of regulatory science on health technologies and contribute actionable information that can be used for improved or novel regulatory policies, rules, guidance documents and other tools with a view to ensuring that European patients and healthcare professionals have access to safe and effective innovative health technologies. Proposals should ultimately contribute to a regulatory environment that makes use of the full spectrum of novel biomedical and bio-digital approaches for clinical investigation and evaluation, while promoting a patient-centred approach to health technology innovation, facilitating the timely entry to market of performant and effective innovations and support their uptake in the health systems and clinical workflows without compromising patient safety.

Development of cell-free protein synthesis platforms for discovery and/or production of biologicals

HORIZON-HLTH-2027-01-IND-01

Program:	Horizon Europe Cluster 1
Típus:	Research and Innovation Actions
TRL szint:	nem releváns
Támogatás projektenként:	6 - 8 M EUR
Támogatott projektek száma:	5
Pályázati felület megnyílik:	2027.02.10.
Beadási határidő:	2027.04.13.
Felhívás linkje:	LINK

The application of synthetic biology, potentially also combined with generative AI, and cell-free biosynthesis open up new avenues for the design, discovery and manufacture of therapeutics not only against infectious diseases, but also non-communicable diseases and equally for vaccines.

The proposed work should address at least two of the following elements:

- Address the bottlenecks that currently hamper the large-scale deployment of CFPS, i.e. the lack of a quality-by-design approach, the need to fully characterise the underlying cell lysates and their critical quality attributes and the need for better understanding of the correlations between specific cell lysate properties and CFPS process parameters, specific product quality attributes (such as protein folding), and CFPS platform performance.
- Use synthetic biology techniques for the design of de-novo biomolecules with specific desired properties (antimicrobial, immunogenic, angiogenic, etc.) and develop suitable cell-free systems for the high-throughput screening of the designed biomolecules.
- Develop novel or optimise existing CFPS platforms for the production of the targeted biomolecule to a Good Manufacturing Practices (GMP) conform process, producing clinical-grade material that can be tested in clinical trials.

- **EP PerMed - the European Partnership for Personalised Medicine**

<https://www.eppermed.eu>

Az Európai Személyre Szabott Medicina Partnerség (EP PerMed) célja, hogy a személyre szabott medicina kutatásának, fejlesztésének, innovációjának és megvalósításának előmozdításával javítsa az egészségügyi eredményeket fenntartható egészségügyi rendszerekben, a betegek, állampolgárok és a társadalom javára.

Az aktuális felhívás megjelenése: 2025. november 25.

<https://www.eppermed.eu/funding-projects/calls/jtc2026/>

Címe: **Personalised Medicine for CARdiovascular, MEtabolic, and kidNey diseases (CARMEN2026)**

Beadási határidő (első kör): **2026. február 10. 14:00**

Támogatási keret: 500 000 EUR (192 750 000 Ft)

Támogatási kérelmenként az igényelhető támogatás összeg maximuma **300 000 eurónak megfelelő forintösszeg (121 020 000 Ft).**

Infó nap: <https://www.eppermed.eu/news-events/events/ep-permed-jtc2026-information-day/>

- **European Partnership for Brain Health**

<https://www.brainhealth-partnership.eu/>

Az EP BrainHealth célja a szellemi egészség megőrzése és előmozdítása a társadalomban, valamint a neurológiai és mentális egészségügyi állapotokkal küzdő emberek jólétének javítása Európában és világszerte, annak érdekében, hogy csökkentse és kezelje az agyi rendellenességek betegekre és társadalmakra gyakorolt terheit.

Az aktuális felhívások megjelenése: 2026. január 08.

Címek:

1. **JTC2026 Call 1: EP BrainHealth Felhívás 1: Biological, social and environmental factors that impact the trajectory of brain health across the lifespan – in the field of neurological, mental and sensory disorders -**
<https://www.brainhealth-partnership.eu/calls/jtc2026-neurological-mental-sensory-disorders/>
2. **JTC2026 Call 2: Biological, social and environmental factors that impact the trajectory of brain health across the lifespan – in the field of neurodegenerative disorders –** <https://www.brainhealth-partnership.eu/calls/jtc2026-neurodegenerative-disorders/>

- **European Partnership for Brain Health**

Beadási határidő (első kör): **2026. március 10. 14:00**

Támogatási keret felhívásonként: 500 000 EUR (201 700 000 Ft)

Támogatási kérelmenként maximum 300 000 eurónak megfelelő forintösszeg (121 020 000 Ft), hazai projektpartnerenként maximum 150 000 EUR (60 510 000 Ft), amennyiben a hazai partner a nemzetközi projekt koordinátora, akkor ezen hazai partner esetében 200 000 eurónak megfelelő forintösszeg (80 680 000 Ft) pályázható.

Partnering tool: <https://partfinder.ncbr.gov.pl/>

- **BE READY European Partnership for Pandemic Preparedness**

<https://beready4pandemics.eu/>

A BE READY NOW célja egy európai kutatási ökoszisztéma létrehozása és fenntartása, amely hatékonyan támogatja a járványokra való felkészültséget és gyors reagálást a fertőző betegségek okozta egészségügyi válságokra. A partnerség összehangolja a kutatási prioritásokat és finanszírozókat, hogy közösen zárják be a járványok megelőzéséhez és kezeléséhez szükséges tudományos és technológiai hiányosságokat. Hosszú távon pedig növeli az EU kapacitását a megelőzés, felkészültség, megfigyelés és válaszadás terén, erősítve az egészségügyi rendszerek és állampolgárok ellenálló képességét.

- **ERA4Health**
(European partnership fostering a European Research Area (ERA) for health research)

<https://era4health.eu/>

Az EU által finanszírozott ERA4Health Partnerség 32 szervezetet és 27 finanszírozó intézményt fog össze 21 országból, közös céljuk pedig a nagy hatású transzlációs kutatások előmozdítása a közegészségügyi szükségletek kezelése érdekében.

2026-os felhívás: <https://era4health.eu/calls/preventoo2026.php>

A 2026-os felhívás címe: **Prevent-OO: Understanding and Preventing Overweight and Obesity**

Beadási határidő (első kör): 2026. január 21. 12:00

Támogatási keret: 200 000 EUR (192 750 000 Ft)

Támogatási kérelmenként az igényelhető támogatás összeg maximuma **200 000 eurónak megfelelő forintösszeg (79 500 000 Ft)**, hazai projektpartnerenként maximum **100 000 eurónak megfelelő forintösszeg (39 750 000 Ft)** kérelmezhető.

Már lezajlott felhívások:

CARDINNOV 2023 (Research targeting development of innovative therapeutic strategies in cardiovascular disease)

NANOTECMEC 2024 (Nano and advanced technologies for disease prevention, diagnostic and therapy)

InterHeart 2025 (Understanding the interactions between cardiovascular diseases and comorbidities and/or their therapeutic treatments)

- **European Partnership One Health AntiMicrobial Resistance**

<https://ohamr.eu/>

A „European Partnership: One Health Antimicrobial Resistance” (EUP OHAMR) az egyik kulcsfontosságú partnerség, amelyet az Európai Bizottság a Horizon Europe program keretében az antimikrobiális rezisztencia (AMR) kihívásaira adott válaszok kutatásának és innovációjának támogatására indított.

A 2026-os felhívás címe: **Joint transnational call 2026: New treatments to tackle AMR**

<https://ohamr.eu/funding/funding-opportunities/call-2025-new-treatments-to-tackle-amr/>

Beadási határidő (első kör): **2026. február 2. 13:00**

Támogatási keret: 300 000 EUR (121 020 000 Ft)

- **Partnerségek - widening**

A 2026-os felhívások keretén belül a konzorciumoknak van lehetőségük további partnerek bevonására a pre-proposal szakasz után.

Amennyiben a widening opció elérhető a magyar résztvevők számára, azt hírlevelünkben fogjuk közzétenni.

(Horizon Europe Cluster 4. – ipar)**

Development of safe and sustainable alternatives to substances of concern

HORIZON-CL4-2026-02-MAT-PROD-21

Program:	Horizon Europe Cluster 4
Típus:	Innovation Action
TRL szint:	7
Támogatás projektenként:	6-7,5M EUR
Támogatott projektek száma:	6
Pályázati felület megnyílik:	16 December 2025
Beadási határidő:	17 Mar 2026 / 13 Oct 2026
Felhívás linkje:	LINK

The focus of this topic is on alternatives for the substitution of substances of concern (SoCs) as defined in the Ecodesign for Sustainable Product regulation. The design and development of these alternatives should lead to an innovation cycle covering their (re)design, development, production processes, and integration into products in manufacturing.

The scope includes necessary developments of related processes and technologies to ensure alignment with and integration in industrial manufacturing facilitating uptake of the develop alternatives. If relevant, challenges for the adaption of existing production lines should be identified and solutions proposed.

Proposals should develop new chemical substances, innovative advanced materials or technologies to replace existing SoCs in one of the following areas: energy, mobility, construction, electronics, technical textiles as well as medical devices.

Circular innovative advanced materials: facilitating the transition from design to markets

HORIZON-CL4-2026-01-MAT-PROD-05

Program:	Horizon Europe Cluster 4
Típus:	Research & Innovation Action
TRL szint:	6
Támogatás projektenként:	5-6,5M EUR
Támogatott projektek száma:	7
Pályázati felület megnyílik:	6 January 2026
Beadási határidő:	21 April 2026
Felhívás linkje:	LINK

The focus of this topic is on enabling circularity and resilient supply networks through R&I in advanced materials, in particular recyclable polymers and composites, magnets and metal (alloys) for additive manufacturing, and on accelerating their pathway to market. Proposals should develop new innovative advanced materials (IAMs) with superior or novel functionalities designed for circularity. The scope includes necessary developments of related processes and technologies to ensure integration in industrial manufacturing facilitating uptake of the developed solutions. Proposals should also develop circular business models considering the cost of changes needed along the life cycle of these new materials to facilitate their uptake.

The scope covers the full innovation cycle from the design for circularity and functional integration (new materials designs), development and scaleup (including scalable recovery, recycling and valorisation at end of life), to demonstration of industrial uptake and integration into products.

Sustainable and healthy diets for cardiovascular diseases prevention with the support of digital applications

HORIZON-CL6-2026-02-FARM2FORK-09

Program:	Cluster 6
Típus:	Innovation Actions
TRL szint:	-
Támogatás projektenként:	5-6 M EUR
Támogatott projektek száma:	2
Pályázati felület megnyílik:	2026. január 14.
Beadási határidő:	2026. április 14., 17:00

Felhívás linkje:

<https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/opportunities/topic-details/HORIZON-CL6-2026-02-FARM2FORK-09>

Project results are expected to contribute to all the following expected outcomes:

- identified the effects of sustainable and healthy diets on the gut microbiome and on the cardiovascular system using AI and digital tools by considering different groups of the population as well as gender;
- increased knowledge generated through the use of AI and existing digital tools on how to help people improving their eating habits by choosing healthy diets to prevent cardiovascular disease;
- the scientific communication on the link between sustainable and healthy diet and the prevention of cardiovascular diseases is translated into digital health solutions developed by SMEs and start-ups;
- improved understanding of the link between the decrease of specific nutritional risk factors and the increase of beneficial nutritional intake in the prevention of cardiovascular diseases, through the support of digital solutions developed by SMEs and start-ups.

This Challenge looks to translate decades of ageing research into tangible biopharmaceutical solutions for healthy ageing.

This Challenge looks to accelerate the development and uptake of clinically validated interventions that target the root cause of multiple age-related morbidities. It will:

- Deliver biotechnology-based interventions for healthy ageing
- Accelerate the implementation of personalised care in ageing based on molecular phenotyping
- Provide recommendations for regulatory pathways addressing ageing as a target to inform developers, regulators, and other decision makers, and
- Improve citizen literacy on longevity.

IV.2 Translating Disruptive New Approach Methodologies (NAMs) into Practice

HORIZON-EIC-2026-ADVANCED INNOVATION CHALLENGES

Program: **EIC Accelerator Open**

Típus: **Research & Innovation Action**

TRL szint: **6-9**

Támogatás projektenként: **Grants up to 2,5 M
Equity up to 10 M**

Támogatott projektek száma: **-**

Pályázati felület megnyílik: **-**

Beadási határidő: **2026. március 18.**

Felhívás linkje:

Még nem érhető el

This Challenge competition therefore looks to accelerate the adoption of NAMs in biomedicine and support companies that want to bring NAMs to the market.

Applicants should propose innovative and disruptive NAMs addressing one or both of the following areas:

- Preclinical biomedical research
- Testing of medicinal products and medical technologies for safety, efficacy, or quality.

Human organoids or microphysiological systems (e.g. organ-on-chip, disease-on-chip), in chemico methods, digital twins, virtual patient simulations, AI-enhanced predictive models, mechanistic or integrated in silico platforms, 3D- advanced human tissue model are in scope.

PARTNERKERESÉSI LEHETŐSÉGEK ÉS TOVÁBBI INFORMÁCIÓK

Partnerkeresés a [Funding & Tenders Portal](#)on:

Funding → Calls for proposals menüpont alatt pályázati kiírás kódja szerint keresve minden egyes kiírásnál a bal oldali menüben található egy **Partner search announcements** menüpont, ezt megnyitva az egyes téma kiírásokhoz tartozó partnerkeresések láthatók.

The screenshot displays the EU Funding & Tenders Portal interface. The top navigation bar includes the European Commission logo and the portal title. Below it, a secondary navigation bar contains links for Home, Funding, Procurement, Projects & results, News & events, Work as an expert, and Guidance & documents. The main content area shows the breadcrumb trail: Home > Funding > Calls for proposals > The ocean-climate-biodiversity nexus and marine carbon dioxide removal (mCDR). The specific call is identified as 'The ocean-climate-biodiversity nexus and marine carbon dioxide removal (mCDR)' with the reference 'HORIZON-CL6-2025-02-CLIMATE-01'. A 'Topic' tag indicates 'Call for proposal'. On the left, the 'Internal navigation' menu lists several options: General information, Topic description, Topic updates, Destination, Conditions and documents, Budget overview, and 'Partner search announcements', which is highlighted with a red rectangle. The right side of the page provides 'General information' about the call, including the Programme (HORIZON), Call (Cluster 6 Call 02 - single stage (HORIZON-CL6-2025-02)), Type of action (HORIZON-RIA HORIZON Research and Innovation Actions), Type of MGA (HORIZON Lump Sum Grant [HORIZON-AG-LS]), Deadline model (single-stage), and Opening date (06 May 2025).
