Attention - Re-launch of the Partner Search October 2017

In view of the European Commission launching new Horizon 2020 work programme service of the Horizon 2020 NCP network projects NMP TeAm, NCPs CaRE and C-I services for you! These entail the following and will be effective from 16 October 2017:

- Common registration level for the three activities. This will allow registered users to access on call topics of all the activities. Which means, that a registrant only needs to fill in once and choose the specific database of interest.
- Topic specific deadlines to avoid entries on already closed calls for proposals.
- General overhaul of the tool.

Partner Search - Partner Offer – How does it work

This partnering tool supports potential applicants for **NMBP Work Program 2018-**

Topic Description

Specific Challenge:

The main purpose of the Circular Economy (CE) is to develop material/product business models that are environmental sustainable, with actions supporting each stage of the value chain (from production to consumption, design to recycling and upcycling of waste-materials) while promoting industrial and social innovation. The main challenge is to evaluate product improvement, taking into consideration, all relevant subsystem interactions (technical, economic and social) and all the life cycle stages of the product. However, although environmental indicators and methodologies for product level assessment are well advanced and harmonised (LCA-PEF^[1]) this is not
