Reference Documents

This page includes all the H2020 & FP7 reference documents starting with legal documents and the Commission work programmes for research and innovation up to model grant agreements and guides for specific actions and horizontal issues. The documents are grouped by categories. It also includes reference documents of other EU programmes, as 3rd Health, Consumer, COSME and Research Fund for Coal and Steel programmes. To access a document:

- Click on a folder
- Click on ARROW to have more information about the document and its available translations

You can search a specific H2020 or FP7 document on the [Europa Search](#) service.

WHAT KIND OF PROJECTS ARE WE LOOKING FOR?

Research & innovation

actions that establish new knowledge or develop more energy-efficient technologies and solutions.

EU funding rate: 100%

Innovation

actions that demonstrate the viability of new technologies and solutions or support their first deployment in the market.

EU funding rate: 70%

*except non-profit organisations: 100%

Coordination & support

actions* that improve skills, mobilise large-scale investments or facilitate EU policy implementation.

EU funding rate: 100%

Also: ERA-NET Cofund & Public Procurement of Innovative Solutions (PPI)

Project consortia must generally consist of at least 3 legal entities from 3 different Member States or Associated Countries

*Building on the 2007-2013 Intelligent Energy Europe programme.

http://ec.europa.eu/research/participants/data/ref/h2020/wp/2016_2017/main/h2020-wp1617-energy_en.pdf 11

1. Heating and cooling	13
EE-01-2017: Waste heat recovery from urban facilities and re-use to increase energy efficiency of district or individual heating and cooling systems.....	14
EE-02-2017: Improving the performance of inefficient district heating networks.....	15
EE-03-2016: Standardised installation packages integrating renewable and energy efficiency solutions for heating, cooling and/or hot water preparation.....	16
EE-04-2016-2017: New heating and cooling solutions using low grade sources and thermal energy.....	18
EE-05-2016: Models and tools for heating and cooling mapping and planning.....	19

Who's who?

Timeline

Smart Cities and Communities

The European Innovation Partnership on Smart Cities and Communities

http://ec.europa.eu/eip/smartcities/index_en.htm

The European Innovation Partnership brings together cities, industry and citizens to improve urban life through more sustainable integrated solutions.

This includes applied **innovation**, better **planning**, a more **participatory approach**, higher **energy efficiency**, better **transport** solutions, intelligent use of Information and Communication Technologies (**ICT**), etc.

Invitation for Commitments

The Invitation for Commitments closed on 15 June. 370 eligible commitments were submitted by over 3000 partners. See [info graphic](#). All commitments are published on the online marketplace <http://eu-smartcities.eu/>.

The first public draft of the [Operational Implementation Plan](#) (2.15 Mb), the operational annex to the [Strategic Implementation Plan](#) (880 kB), has now also been published and gives a wealth of detailed examples for integrated smart city solutions.

Technology, market and economic aspects...

Download the **Geothermal Energy: Technology Information Sheet**

EERA Geothermal Joint Programme Coordinator Ernst Huenges talks to SETIS

What are the main geothermal energy technologies, and which of these technologies has the greatest potential on the European market?

E.H.: Geothermal energy technologies depend on the specific geological setting. We have hot water bearing horizons in many parts of Europe. We call them hydrothermal reservoirs. In addition, the ground all across Europe has increasing temperature with depths. The horizons which do not bear water are called petrothermal

systems. A general technology to economically exploit these reservoirs is to follow the

MARITIME

Opening of registrations: Energy Efficiency Call Info Day 8 December 2015

© 06/11/2015

How to apply for funding? What are the Energy Efficiency priorities of the Horizon 2020 2016 call for proposals deadline 15 September 2016? If you are asking these questions or if you want to network and raise questions to the EASME team during the dedicated information sessions, register for the Info Day.

Who should attend?

SME associations, businesses, European and national trade associations, chambers of commerce, European institutions, etc. are expected.

When?

Tuesday 8 December 2015 in Brussels

Why attend?

Applying for funding is a competitive process, and only the best project proposals will be selected for funding.

The Information Day 2015:

- gives you an update on the European policy on sustainable energy
- presents you the Energy Efficiency priorities of the H2020 2016 calls for project proposals
- tells you how to apply for funding
- offers dedicated workshops for each funding area with the opportunity to meet the EASME team and have answers to your questions
- is an opportunity to network and find project partners

<https://ec.europa.eu/easme/node/6551>

International B2B meetings at Greencities & Sustainability 2015

Within the Framework of the next edition of the Greencities & Sustainability Forum: “**Smart Solutions to Urban Mobility**” (www.greencitiesmalaga.com), Enterprise Europe Network –CESEAND organizes a Brokerage event to promote the generation of strategic alliances in this field. **We expect to create a discussion forum to facilitate the exchange of knowledge, matchmaking and networking with stakeholders of diverse profiles, providing a room and a layout for future projects and collaborations.**

Greencities & Sustainability is a highly specialized professional Forum based on **3 activities**:

- Forum of debates and knowledge: conferences and speeches focus on ICT & Sustainability and Sustainable Cities
- Green lab: elevator pitch of sample of products and services for efficient management
- B2B meetings: Generation of networking and business opportunities

Besides, the Forum of technology, Innovation and Knowledge of Latin America - **TIKAL Forum** - is held once again parallel to Greencities & Sustainability. In the 2014 edition 30 municipalities and 68 speakers from 12 Latin American countries participated at this event. Therefore this event also provides a great opportunity to establish strategic links with Latin American countries.

<https://www.b2match.eu/greencities2015>

Main Topics

Building

- Energy Efficiency
- Architecture and Sustainable urbanism
- Construction materials
- Lightning
- Heating and Cooling

Cities

- Smart Cities
- Sustainable mobility and green transports
- Environment
- Water and waste treatment
- Energy

Reasons to participate

- **100% professional meeting:** strong focus on business generation
- **Establish strategic contacts:** City – Enterprise & Enterprise –

Participants

Participation is open to companies, universities, technology centres, research institutes, municipalities, consultancies and professionals from all over Europe and beyond.

Registration
 closed since 2 Oct 2015

Session 2: Horizon 2020: implementation

 NEMZETI KUTATÁSI,
FEJLESZTÉSI
ÉS INNOVÁCIÓS HIVATAL

INEA: Robert Goodchild, Head of Unit 'Energy research', INEA

How does InnovFin EDP work?

- Eligibility check
- EIB can only finance 50% of project costs
- Comprehensive due diligence (legal, financial, technical, etc.)
- EIB standard documentation under English or Luxembourgish law
- Supported by Horizon 2020

SME instrument	133
Fast-track-to-Innovation pilot.....	134
Other actions.....	135
1. Horizon prize for CO2 reuse	135
2. Horizon prize for a Combined Heat and Power (CHP) Installation in a hospital using 100% Renewable Energy Sources.....	137
3. Horizon prize for Integrated Photovoltaic System in European Protected Historic Urban districts	139
4. Assessment of costs and benefits and of macro-economic impacts of energy efficiency policies	141
5. Assistance with the verification of compliance of national legislative measures implementing Directive 2012/27/EU on energy efficiency	141
6. Improvement of CHP data collection.....	141
7. Analysis of calculation method of Member States for their indicative national energy efficiency target (Article 3 of the Energy Efficiency Directive).....	142
8. Online platform.....	142
9. Research on the need for training and retraining of energy system professionals	142
10. Monitoring the impact of the information and dissemination activities on available energy efficiency mechanisms and financial and legal framework carried out by the Member States.....	143
11. Study on the impact of energy audits requirement on large industry	143
12. Support to the initiative on sustainable energy in the defence and security sector	144
13. Study analysing the cost-effective share of efficient district heating and cooling in the EU.....	145
14. Study on utility models	145
15. Study on heat market design including coordination, pricing and trading mechanisms, business models, as well as consumer protection, engagement and participation models and conditions	145
16. Continuation of the Building Stock Observatory and production of relevant bottom-up statistical data on buildings	146
17. Support for the implementation of the EU voluntary certification scheme for non-residential buildings and related follow-up to standardisation work on EPBD and related communication and dissemination	146
18. Provision of technical assistance, studies and/or IT tools to collect and analyse relevant data and to properly assess complex technical, environmental, economic, legal and social	147
