

Hungarian Innovation Strategy and Biobased Economy

László Korányi, Acting President

New National RDI Strategy

- 2014-2020
- Overarching goals, like
 - GERD 1.2% -> 1.8%
 - University/research institute technology transfer
 - Start-up ecosystem
- Sectoral and regional approach (S3)

Sector:
Renewable Energy Related R&D

- New technologies in biofuels, bioenergy (bio-ethanol, biodiesel, biogas, waste recycling); Biomass – largest single source of renewable
- Development in bio refineries, biofurnaces

Sector: RDI in Agriculture

Favorable conditions in Hungary (90% arable land)

- Improving energy efficiency in agriculture
- Methanol economy
- Optimization of transportation-chains – closing the gap between producers and consumers

Increasing the competitiveness in Europe

Wish you a very fruitful meeting; build a BRIDGE
between innovative ideas to share a European
vision of a biobased economy

Thank you for your kind attention
