

PROCUREMENT OF BUILDING INNOVATION SOLUTIONS

PROBIS. European Commission Programme # 65/G/ENT/CIP/13/N02C021

PROBIS HIGHLIGHTS

The **PROBIS Project** is aimed at establishing favourable framework conditions for the introduction of innovative solutions in the public construction sector in Europe.

A consortia of 10 members from Italy, Spain, Sweden and Hungary join forces for the development of smart pilot projects using innovative solutions in the field of energy efficiency, renewable energy sources and the protection of the environment.

The project includes the identification of specific needs of buildings, technical dialogue with innovative market suppliers, the launch of innovative public procurement calls, as well as training actions addressed to a network of public authorities, the implementation of the pilot projects and the monitoring of results.

The innovative character of the proposed solutions and their methodology is highly replicable among other public procurement authorities in Europe.
